

Address Antimicrobial Resistance through One Health Approach

Junxia Song
Senior Animal Health Officer
The Joint Centre for Zoonotic Diseases and AMR, FAO

What is One Health

A collaborative, multidisciplinary, and multisectoral approach that can address urgent, ongoing, or potential health threats at the human-animal-environment interface at sub-national, national, global, and regional levels"

(FAO-OIE-WHO, 2019)

What FAO is doing

Policies and guidance

Addressing the drivers and working in prevention

Supporting countries to detect and respond to one health threats(including AMR)

Collaboration and partnerships

FAO Action Plan on AMR 2021-2025

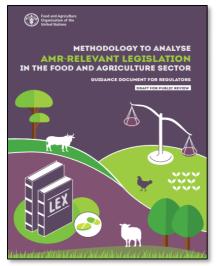

Supporting innovation and resilience in food and agriculture sectors

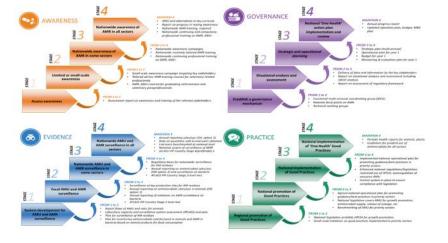

Enabling **good practices** to prever infections and control the spread of resistant microbes

Tools for capacity building on AMR – One Health response

- FAO Progressive Management Pathway for AMR (FAO-PMP-AMR) (11 countries)
- Assessment Tool for Laboratories and AMR Surveillance Systems (FAO-ATLASS) (>140 laboratories, 28 countries)
- Legal methodology to analyze AMR-relevant legislation in the food and agriculture sectors (22 countries)
- Tool for Situation Analysis of AMR Risks in the food and agriculture sectors (13 countries)
