Important AMR ACTIVITIES

Prudent use

Communicable
disease
control

Development
and controlled
use of new
antibiotics

The role of surveillance for prudent use

- Treatment guidelines
- Evaluate the current practises
- Evaluate effect of measures

The role of surveillance for disease control

- Detect outbreaks and changes in epidemiology
- Evaluate measures

The role of surveillance for sharing data

- Identify common problems and solutions
- Establish good examples

Sweden will support global efforts and is planning to host a broad stakeholder meeting at the end of 2014 to support global surveillance

Welcome to Stockholm
