Data Quality Review (DQR) Desk Review Tools and Methods Workshop

Session 7: Practical application of the DQR methods and tools

Configure and use the DQR with your country data

Learning Objective

Learning Objective is to practice the analysis and interpretation of data quality metrics using data from their own health information systems. Specifically, by the end of the workshop the participants will;

- Practice and develop competency for:
    - Inputting routine data from country DHIS 2 and/or other HMIS and Health Program datasets into the DQR Excel-based tool
    - Configuring WHO DHIS2 Data Quality app for the local instance of DHIS 2
    - Configuring and inputting data into the Excel-based DQR Desk Review Tool
    - Analyzing and interpreting findings from Desk Review on local datasets
    - Creating an Annual Report and Dashboard for selected indicators in the WHO DHIS 2 Data Quality app.

Exercise – Produce an annual report in the DHIS 2 WHO Data Quality app.

Your instructor will walk you through:

- Brief demonstration of the Annual Repot

- Production and review of the Annual Report
