World Drowning Prevention Day 2022

KEY FACTS – GLOBAL

Drowning is a leading killer.

At least 236,000 people die from drowning each year.

There are approximately 27 drowning deaths, every hour, every day.

Drowning is the 3rd leading cause of unintentional injury death worldwide.

Over 90% of drowning deaths occur in low- and middle-income countries.

RISK FACTORS

Wherever there is water, there is a threat of drowning.

Anyone can drown, no one should.

Drowning among children and young people

Drowning is one of the leading causes of death for people aged 1-24 years.

Over half of all drowning deaths are among those aged under 30 years.

Children who live near open water sources, such as ditches, ponds, irrigation channels, or pools, are especially at risk of drowning.

Whether in a bucket, bathtub, pond or pool, almost all water is a risk for drowning – especially where young children are concerned.

Drowning among men

Males are twice as likely to drown as females.

Higher drowning rates among males are associated with increased exposure to water and riskier behavior such as swimming alone, drinking alcohol before swimming and boating.

Drowning associated with transport

Transport on water, especially on overcrowded or poorly maintaned vessels, results in an increased risk of drowning.

Daily commutes in low-income countries often take place on overcrowded, unsafe vessels lacking safety equipment, or are operated by personnel untrained in dealing with transport incidents or navigation.

Drowning and occupational health

Commercial fishers, and subsistence fisherfolk – particularly those in low-income countries using small boats – are at greater risk for drowning.

Drowning and climate change

Flood disasters, extreme rain fall, storm surges, tsunamis and cyclones cause an increase in risk of drowning.

Flood disasters are becoming both more frequent as well as more severe and this trend is expected to continue as part of climate change.

Drowning accounts for 75% of deaths in flood disasters.

In low- and middle-income countries, many homes are located on lakes or riverbanks, and some are built over the water. This, along with poor flood disaster protection, puts local people at greater risk of drowning.

DROWNING PREVENTION

Drowning is preventable.

There are many actions to prevent drowning.

The World Health Organization encourages all countries to implement drowning prevention programming through implementation of the following <u>six recommended interventions</u>:

Intervention #1: Install barriers that control access to water

Placing barriers strategically so access to water hazards is limited or more tightly controlled reduces exposure and drowning risk.

This may include covering wells and cisterns (water tanks), using doorway barriers and playpens, and fencing swimming pools.

Intervention #2: Provide safe places away from water for pre-school children, with capable childcare

Community-based, supervised childcare for pre-school children can reduce drowning risk and has a wide range of other proven benefits.

Intervention #3: Teach school-aged children swimming, water safety and rescue skills

Swimming and water safety skills must be delivered using a structured, safety-tested curriculum, in a safe training environment. Trained instructors are required to deliver the training with appropriate risk management in place, following practical guidance of the World Health Organization. This guidance covers a range of measures to reduce risk including aspects such as: student-instructor ratios, safety audits, physical attributes of the training site and others.

Intervention #4: Train bystanders in safe rescue and recusitation

Death occurs within minutes of the drowning process starting. Rescue and resuscitation must therefore be done immediately at the scene of a drowning event if it is to be effective. This makes it highly

desirable that the skills to perform rescue and resuscitation of drowning victims are present in as much of the population as possible.

Intervention #5: Set and enforce safe boating, shipping and ferry regulations

Regulation of safety measures for boats includes carrying out regular maintenance checks, ensuring the captain has the necessary skills and competence to command the vessel, avoiding overloading with passengers or goods, ensuring boats carry appropriate safety equipment, and restricting travel in poor weather.

Intervention #6: Improve flood risk management, locally and nationally

Building resilience to flooding and managing flood risks through better disaster preparedness planning, land use planning, and early warning systems can prevent drowning during flood disasters.

Drowning deaths by country, for the year 2019

To report a WHO attributed number of drowning deaths in a specific country, use the formulation and table provided below:

"The World Health Organization estimates that [insert number from table below] people died from drowning in [insert country name] in 2019."

Note: The values provided below are WHO estimates, and we acknowledge that national bodies may have more recent or comprehensive data on drowning burden.

Country name	Number of people who have died from drowning in 2019
Afghanistan	996
Albania	25
Algeria	451
Angola	1600
Antigua and Barbuda	2
Argentina	380
Armenia	21
Australia	177
