

WHO STIs sessions at STI & HIV 2023 World Congress

Chicago, USA (24-27 July 2023)

Agenda

Monday July 24th, 2023

Part 3: 13:00 – 14:20 – New developments in the response to AMR STIs: surveillance efforts, new treatments and diagnostics and better strategies for LMICs

The session will present some of the latest developments in the field, share experiences within low- and middle-income countries (LMICs) and chart the way forward in addressing antimicrobial resistance in *Neisseria gonorrhoeae*. The session will share LMIC experience and challenges in addressing AMR in *Neisseria gonorrhoeae*, present new or near market diagnostics and therapeutics, new treatment guideline developments and define implementation as well as research and the gaps to better address AMR in *Neisseria gonorrhoeae*.

Partners: FIND, GARDP and WHO

Chair: Remco Peters (Foundation for Professional Development - University of Pretoria – South Africa)
