PANEL DISCUSSION INVITATION

Thirty years of SRH progress and challenges since the International Conference on Population and Development: Evidence from global datasets

VLADIMIRA KANTOROVA
Population Division, DESA, United Nations
Population Division will present key trends in global fertility since 1994 for adolescent births and contraceptive use, including trends in use by specific methods, and discuss how these global datasets and analysis have been used in monitoring internationally agreed development goals and analyzing the progress made toward these goals.

JONATHAN BEARAK
Guttmacher Institute
Guttmacher Institute will present a global comparative analysis of disparities in women's success in preventing undesired pregnancies, preliminary estimates of the impact of contraception and abortion on trends in undesired births over the past half century, and associations with country income and gender inequality.

JENNY CRESSWELL
WHO/HRP
WHO will present key trends in maternal mortality since 1994 and discuss how measurement and monitoring, along with use of maternal mortality data have improved over time to allow greater data-driven programmatic decisions and policy-making to reduce maternal mortality.

ONIKEPE OWOLABI
Guttmacher Institute
Guttmacher Institute will present a summary highlighting progress on conceptualizing and implementing SRHR measurement, gaps in the data ecosystem and in funding to support SRH services, and what needs to be done to make greater progress in the next decades to comprehensively measure SRHR and ensure that no one is left behind.

EVENT FORMAT
Introductory remarks by moderator and presentations by speakers, followed by moderated Q&A
