Section 2000: Health State Descriptions

Time Begin :

Now we will switch to questions specifically about your health. The first questions are about your overall health, including both your physical and your mental health. By difficulty in the second question, I mean requiring increased effort, discomfort or pain, slowness or changes in the way you do the activity.

Q2000	In general, how would you <u>rate your health today</u> ?	1 Very good 2 Good 3 Moderate 4 Bad 5 Very bad
Q2001	Overall in the last 30 days, how much difficulty did you have with <u>work or household activities</u> ?	1 None 2 Mild 3 Moderate 4 Severe 5 Extreme/cannot do

Now I would like to review the different functions of your body. When answering these questions, I would like you to think about the last 30 days, taking both good and bad days into account. When I ask about difficulty, I would like you to consider how much difficulty you have had, on average, in the last 30 days, while doing the activity in the way that you usually do it. Let me remind you, by difficulty I mean requiring increased effort, discomfort or pain, slowness or changes in the way you do the activity.

INTERVIEWER: Read and show scale to respondent.

VIGNETTES FOR HEALTH STATE DESCRIPTIONS

This next section will require additional concentration. I will read to you some stories about people with varying levels of difficulties in different areas of health. I want you to think about these people's experiences as if they were your own. Once I have finished reading each story, I will ask you to rate what happened in the story.

I would like to know how you view each story and rate how much of a problem or difficulty the person described has in that area of health in the same way that you described your own health to me earlier. While giving the rating, think of the person in the story as someone who is of your age and background.

Set A Affect and Mobility

[Alan] is able to walk distances of up to 200 metres without any problems but feels tired after walking one kilometre or climbing up more than one flight of stairs. He has no problems with day-to-day physical activities, such as carrying food from the market.

	Overall in the last 30 days, how much difficulty did...	None	Mild	Moderate	Severe	Extreme/ Cannot do

Q2102	...[Alan] have in <u>vigorous activities</u> ('vigorous activities' require hard physical effort and cause large increases in breathing or heart rate)?	1	2	3	4	5

[Wen] feels nervous and anxious. He worries and thinks negatively about the future, but feels better in the company of people or when doing something that really interests him. When he is alone he tends to feel useless and empty.

	Overall in the last 30 days, how much of a problem did...	None	Mild	Moderate	Severe	Extreme/ Cannot do
Q2103	...[Wen] have with <u>feeling sad, low, or depressed</u> ?	1	2	3	4	5
Q2104	...[Wen] have with <u>worry or anxiety</u> ?	1	2	3	4	5

[Alejandro] has a lot of swelling in his legs due to his health condition. He has to make an effort to walk around his home as his legs feel heavy.

	Overall in the last 30 days, how much difficulty did...	None	Mild	Moderate	Severe	Extreme/ Cannot do
Q2105	...[Alejandro] have with <u>moving around</u> ?	1	2	3	4	5
Q2106	...[Alejandro] have in <u>vigorous activities</u> ?	1	2	3	4	5

[Manjima] enjoys her work and social activities and is generally satisfied with her life. She gets depressed every 3 weeks for a day or two and loses interest in what she usually enjoys but is able to carry on with her day to day activities.

	Overall in the last 30 days, how much of a problem did...	None	Mild	Moderate	Severe	Extreme/ Cannot do

Section 2500: Anthropometrics, Performance Tests and Biomarkers

Time Begin :

Before we ask you more questions, this time about your own health and well-being, we would like to measure a few things, like your blood pressure, your weight and height. We'll also ask you to participate in a few tests to determine your health status.

Blood Pressure

First I would like to measure your blood pressure and pulse rate. Stay seated, and once I put this on your wrist keep it steady and at the level of your heart. We will need to take the blood pressure reading three times. It will squeeze your wrist a bit, but won't hurt. Relax.

INTERVIEWER: respondent should remain seated. Demonstrate to the respondent how to hold their arm while the machine is measuring. Place the monitoring device on the wrist and have the respondent hold it at heart level against his/her chest. When the device is in the correct position and respondent is relaxed, press the button to start. Check to make sure it is working. Collect the blood pressure and pulse 3 times with one minute between each measurement. You do not need to remove the device between measurements.

Q2501 Time 1 Systolic

Diastolic

Q2501a Time 1 Pulse rate / minute

INTERVIEWER: Ask the respondent to release the arm and relax. Wait for one minute before time 2. Do not ask the respondent questions. Use this time for quality control checks.

Okay, now we can get your second measurement for your blood pressure.

Q2502 Time 2 Systolic

Diastolic

Q2502a Time 2 Pulse rate / minute

INTERVIEWER: Again, remind the respondent to relax. Meanwhile, when waiting to take the third measurement, you can locate and measure out a 4 metre length to prepare for the vision test and timed walk.

Okay, now we can get your third measurement for your blood pressure.

Q2503 Time 3 Systolic

Diastolic

Q2503a Time 3 Pulse rate / minute

<i>INTERVIEWER: For the following questions about height and weight, probe if needed to get the respondent's best estimate or guess.</i>	
Now that we have your blood pressure measured, can you please tell us:	
Q2504	What is your height in centimeters? <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> centimetres

ANTHROPOMETRIC MEASUREMENTS

I would now like to measure how tall you are. To measure your height I need you to please take off your shoes. Put your feet and heels close together, stand straight and look forward standing with your back, head and heels touching the wall. Look straight ahead.	
Q2506	<div> <i>Measured height in centimetres</i> </div> <div style="text-align: right; margin-top: 5px;"> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> centimetres </div> <div style="text-align: right; margin-top: 5px;"> 997 Refused 998 Not able </div>
Now we want to measure your weight - could you please keep your shoes off and step on this scale. We will also measure your waist and hips using a tape measure.

TIMED WALK

INTERVIEWER: you will now invite the respondent to do a walking test - using your flexible steel tape measure, mark out length of 4 metres over a flat and straight surface if you have not already done so. Mark the ground at the beginning and end. Mark sure the surface is flat and free of obstacles. You will walk slightly behind the person for both tests.

Normal walk

Now I am going to observe how you normally walk. If you use a cane or other walking aid and would be more comfortable with it, then you may use it. This is the walking course. I want you to walk to the other end of the course at your usual speed, just as if you were walking down the street to go to the store. Walk all the way past the other end of the tape before you stop. I will walk with you.

INTERVIEWER: DEMONSTRATE.

Do you feel this would be safe? *If yes, continue.*

When I want you to start, I will say: "Ready, begin."

Ready begin.

Q2511	Time at 4 metres	<input type="text"/> <input type="text"/> . <input type="text"/> SECONDS	

Rapid walk

Now I want to repeat the walk. This time, however, I would like you to walk at a rapid pace, as fast as you safely can, and go all the way past the other end of the course I marked out for you.

INTERVIEWER: DEMONSTRATE.

When I want you to start, I will say: "Ready, begin."

"Ready begin."

VISION TEST

We are now going to test your distance vision and near vision.

INTERVIEWER: Invite the respondent to sit again - in a chair positioned so that the respondent's head will be 4 meters from the eye chart. Make sure the person does not lean in closer to the chart during the test.

To measure acuity in the left eye, the right eye is covered with right palm or an eye patch and the subject is asked to respond to each "E" in a row slowly, row by row, with your guidance. Only one reading of a given "E" is allowed. When the subject has difficulty, he or she is encouraged to guess. Responses can be verbal (Up, Down, Left, Right) or the respondent can indicate with a finger like in the training video. The right eye can then be tested in the same way. Visual acuity in each eye can be recorded as explained in the Interviewer's Manual.

DISTANCE VISION

INTERVIEWER: Start with the distance vision chart - using the 4 metres measured out for the timed walk. If the respondent makes more than 2 errors in one row, and reads all letters in the row, their result is read as the previous row. Select and record the result from the column labeled "DECIMAL" on the left side of the chart.

We will start with your distance vision - and with your left eye. Would you please cover your right eye with the palm of your right hand. Please read

Q2514 Distance Vision - Left Eye

----------------------	---	----------------------	----------------------

NEAR VISION

INTERVIEWER: Have the person place the end of the cord attached to the near vision chart between forefinger and middle finger. Then place the palm over the eye with the same hand. The free hand is used to hold the chart. Responses will be verbal (Up, Down, Left, Right). If the respondent makes more than 2 errors in one row, and reads all letters in the row, their result is read as the previous row. Select and record the result from the column labeled "DECIMAL" on the right side of the chart.

Okay, now we would like to test your near vision - starting again with your left eye - please cover your right eye with your right hand. Indicate if the "E" is facing Up, Down, Left or Right. Please read....

Remain sitting and let your hand drop to your side. Keep your upper arm against your body and bend your elbow to 90 degrees with palm facing in (like shaking hands). Keep your elbow pressed against your side.

INTERVIEWER: DEMONSTRATE.

Then grab the two pieces of metal together like this.

INTERVIEWER: DEMONSTRATE.

I will ask you to do this two times in each hand. Let's start with your left hand, please take this in your left hand. If you feel any pain or discomfort, tell me and we will stop.

When I say "squeeze", squeeze as hard as you can.

INTERVIEWER: Check positioning and grip to make sure it is correct. WHEN HE OR SHE BEGINS, SAY: SQUEEZE, SQUEEZE, SQUEEZE!

DIGIT SPAN - DIGITS FORWARD

INTERVIEWER: For the following tests, digits forward and backward, say the digits at the rate of one per second, not grouped. Let the pitch of your voice drop with the last digit of each series. In any series if the subject fails Trial 1 - give Trial 2 of the same series, then proceed to the next series if the respondent responds correctly. Trial 2 is only given if Trial 1 is failed.

I am going to say some numbers to you. Listen carefully, and when I am through, say them right after me. I want you to repeat each set of numbers exactly as I say them to you. For example, if I said "1-2", you would say...?

INTERVIEWER: Wait for correct response "1-2". If correct, start with Series 3. If response is incorrect, provide the correct response and attempt once more with another example. Okay, let's try another example, repeat after me, "5-3". If correct, continue. If not correct - mark "0" in Q2534 and → skip to Verbal Fluency (Q2536).

Okay, good. Let us start with the numbers.

INTERVIEWER: Stop when respondent fails both trials.

Series	Trial 1	Trial 1 Correct?	Trial 2	Trial 2 Correct?
3	5-8-2	YES → SERIES 4 NO → TRIAL 2	6-9-4	YES → SERIES 4 NO → END

DIGIT SPAN - DIGITS BACKWARD

Now, I am going to say more numbers, but this time when I stop, I want you to say them to me backwards. For example, if I said 1-7, what would you say?

INTERVIEWER: Wait for subject to say 7-1. If response is correct, start with Series 2. If respondent does not reply correctly or fails to understand, give the correct answer and another example, saying Remember, you are to say them backwards. Try this, "3-8". If response is correct, continue. If fails second example, mark "0" in Q2535 and skip to Verbal Fluency (Q2536).

Okay, lets start.

VERBAL FLUENCY

Now we are going to ask you to think of animals and name as many as you can. I am going to give you one minute and I want to see how many animals you can name.

INTERVIEWER: See Interviewers Manual instructions about what is acceptable and what is not. If respondent stops before the end of the minute, encourage them to try to name more animals. If there is a silence of about 15 seconds, prompt them to continue or repeat the basic instructions.

Ready? Start:

INTERVIEWER: Press START/STOP on stopwatch. Time for one minute. Use space below to record.

INTERVIEWER: SAY “FINE” OR “GOOD” when completed the one minute.

Q2537	Number of errors <i>INTERVIEWER: errors include anything that is not an animal</i>	<input type="text"/> <input type="text"/>

LUNG FUNCTION

Now we will do a test of your breathing to find out how well your lungs are functioning. We will use a device called a spirometer - this can show how much air you can breathe in and out. It also shows how fast you can breathe in and out. A good effort during the testing is important to get good results.

I will ask you to take in the deepest possible breath, then blowing out as hard and as fast as you can into the device. It is important that you continue blowing until you have no breath left in your lungs. Let me explain the steps before you attempt.

1. Take a deep breath - fill your lungs and stomach.
2. Seal lips around the mouthpiece
3. Blow out – hard and fast – in one continuous blow, until there is nothing left to blow.

Please watch carefully as I demonstrate.

INTERVIEWER: Demonstrate how to do the lung function test.

INTERVIEWER: Make sure to show the respondent that you are using a clean mouthpiece on the spirometer before starting. Take a short break in between each trial to give the respondent a chance to return to normal breathing.

We will ask you to practice once, then we will have you use it three times. Okay, are you ready? Take a deep breath, seal your lips around the mouthpiece and **BLOW, BLOW, BLOW!**

PHYSICAL ACTIVITY - (SEE APPENDIX A3000D)

Next I am going to ask you about the time you spend doing different types of physical activity in a typical week. Please answer these questions even if you do not consider yourself to be an active person. Think first about the time you spend doing work. Think of work as the things that you have to do such as paid or unpaid work, household chores, harvesting food/crops, fishing or hunting for food, providing care or seeking employment.

In answering the following questions 'vigorous activities' require hard physical effort and cause large increases in breathing or heart rate, 'moderate activities' require moderate physical effort and cause small increases in breathing or heart rate.

Q3016	Does your work involve <u>vigorous-intensity</u> activity that causes large increases in breathing or heart rate, [like heavy lifting, digging or chopping wood] for at least 10 minutes continuously? <i>INSERT EXAMPLES & USE SHOWCARD</i>	1 YES 2 No→	Q3019

OUTPATIENT CARE AND CARE AT HOME

Now I will shift away from questions about overnight stays – to questions about health care you received that did not include an overnight hospital stay. The following questions are about care you received at a hospital, health centre, clinic, private office or at home from a health care worker, but where you did not stay overnight.

Q5026	Over the <u>last 12 months</u> , did you receive any health care NOT including an overnight stay in hospital or long-term care facility?	1 YES 2 No→	Q5046
Q5027	In total, how many times did you receive health care or consultation in the <u>last 12 months</u> ?	<input type="text"/> <input type="text"/> TIMES	

Now I would like you to think about the most recent visit - and ask you specifically about your last or most recent visit.

Q5028	What was the last (most recent) health care facility you visited in the <u>last 12 months</u> ?	1 Private doctor's office 2 Private clinic or health care facility 3 Private hospital 4 Public clinic or health care facility 5 Public hospital 6 Charity or church run clinic 7 Charity or church run hospital 8 Home visit 87 Other, specify:

RESPONSIVENESS OF HEALTH SERVICES: VIGNETTES

I am now going to read you stories about people's experiences with health care services. I want you to think about these people's experiences as if they were your own. Once I have finished reading each story, I will ask you to rate what happened in the story as very good, good, moderate, bad or very bad.

[Stan] broke his leg. It took an hour to be driven to the nearest hospital. He was in pain but had to wait an hour for the surgeon and was only operated on the next day.						
Q5046	How would you rate the amount of time [Stan] waited before being attended to?	Very good	Good	Moderate	Bad	Very bad
		1	2	3	4	5
[Patricia] went to a crowded clinic. No-one greeted her. She waited for 30 minutes when a nurse called for her for an examination behind a screen that separated the waiting area from the examination area.						
Q5047	How would you rate [Patricia's] experience of being greeted and talked to respectfully?...	Very good	Good	Moderate	Bad	Very bad
		1	2	3	4	5
[Mario] has been told that he has epilepsy and that he needs to take medication. The doctor has very briefly explained what the condition is. He is very busy and there is a queue of patients waiting to see him. Mario would like to know more about what he has, but feels that there is no time to ask questions. The doctor says goodbye to Mario, and Mario leaves the office.						
Q5048	How would you rate [Mario's] experience of how clearly health care providers explained things to him?	Very good	Good	Moderate	Bad	Very bad
		1	2	3	4	5
[José] shared a hospital room with four other persons. There was a toilet for his ward located along the outside corridor. The room was cleaned once a week, was occasionally dusty, and had only 1 or 2 chairs for visitors.						
Q5049	How would you rate the cleanliness of [José's] room inside the facility and provision for toilets?	Very good	Good	Moderate	Bad	Very bad
		1	2	3	4	5
When the clinic is not busy. [Mamadou] can choose which doctor he sees. But most often it is busy and then he gets sent to whoever is free.						
Q5050	How would you rate [Mamadou's] freedom to choose his health care provider?	Very good	Good	Moderate	Bad	Very bad
		1	2	3	4	5
[Alouine] has his consultation behind a screen separating the consultation area from the waiting area. He has to speak very quietly to avoid other people hearing his conversation.						
Q5051	How would you rate the way the health services ensured [Alouine] could talk privately to the health care providers?	Very good	Good	Moderate	Bad	Very bad
		1	2	3	4	5
[Robert] had a broken arm. The doctor explained different ways of fixing it and then ordered some blood tests. [Robert] didn't know why he needed blood tests and was worried until the doctor explained what they were for.						
Q5052	How would you rate [Robert's] experience of being involved in making decisions about his health care or treatment?	Very good	Good	Moderate	Bad	Very bad
		1	2	3	4	5

SET A. Day reconstruction – Start with Morning

INTERVIEWER: For this module, you will ask the respondent to reconstruct her or his previous day beginning from when s/he woke up. It is unlikely that you will be able to reconstruct the entire day in the 15 minutes allotted for this section. You must stop asking about activities after 15 minutes. Keep track of time elapsed by using the questions like Q7210, Q7260... After 15 minutes, skip to Q7500.

Q7011	<i>Record current time.</i>	<input type="text"/> <input type="text"/> : <input type="text"/> <input type="text"/> TIME
Q7012	<i>Add 15 minutes to compute the end time of this part of the interview.</i>	<input type="text"/> <input type="text"/> : <input type="text"/> <input type="text"/> TIME

INTRODUCTION to Day Reconstruction

Now I would like to ask you questions about what you did yesterday. I want you to try to remember the sequence of activities that you did from when you woke up until later in the day. We'll go through this one activity at a time.

People do different activities throughout the day. Here is a list of examples: working, preparing food, doing housework, watching children, traveling to work or the market, grooming, bathing, eating, exercising, praying, resting, chatting with friends, playing cards, watching TV, listening to the radio, reading the newspaper or taking care of someone.

I would like for you to tell me about all the different things that you did yesterday. You may have done some of the things that I just mentioned. You may have done other things too.

Please keep all of your responses to just a word or two. And you don't have to mention very short activities, like washing hands, which only take one or two minutes. We'll start at the beginning.

Q7013	When did you wake up yesterday? <i>INTERVIEWER: If respondent can't remember, get his or her best guess.</i>	<input type="text"/> <input type="text"/> : <input type="text"/> <input type="text"/> TIME 8888 DON'T KNOW TIME

Section 8000: Impact of Caregiving

Time Begin :

In the following questions, we want to find out about how families and households cope and support each other through prolonged illnesses and death. I would like to spend some time talking to you about people in your household, adults and/or children, who have been ill or died in the last 12 months.

I will ask you a few questions about people in your household who need/needed care, due to illness or other reasons, or have been ill and died in the last 12 months. I would like to know more about any adult and any children and their caregiver in the household. The information you provide will be kept strictly confidential and will be used to improve programs for families and children in need. It is possible that you may feel uncomfortable answering some of the questions. You can choose if you don't want to answer some questions.

I acknowledge that there are many conditions, illnesses and situations that require household members to provide care for other household members. But I will start with a question about a specific condition which often creates a high need for care.

Q8001	Have you ever heard of an illness called AIDS [<i>or use local term</i>] or a virus called HIV [<i>or use local term</i>]?	1 YES 2 NO 8 DON'T KNOW	
People who are seriously ill usually need to be given care and assistance. This includes both daily personal care such as help with eating, dressing, bathing, moving around in the house as well as assistance with their affairs outside the house such as transportation to see doctors, going to buy medicine, or managing the ill person's financial situation, health care, emotional well-being or other personal affairs. I want to know who in your household has needed care or support and what level they needed.			
Q8002	Over the last 12 months, have any members of your household, adults or children, needed care or support for any reason? This could include financial, physical, emotional, health or personal care or support.***	1 YES 2 NO→	Q9001
I would like to start with the adults aged 18 and older in your household – and will then ask about children later. This adult may still need care or may no longer be living in the household or may have died as a result of an illness or other reason.			
Q8003	In total, how many adult household (HH) members have needed care or support in the last 12 months?	<input type="text"/> <input type="text"/>	

INTERVIEWER: Using Section 0400 HH Roster from the HH QUESTIONNAIRE – determine who in the household needed and received caregiving. This may include people who are not currently in the household, but needed care from a HH member in the last 12 months. Start with adults aged 18 and older in Q8004, then move to children in Q8028. This includes the following types of care and/or support:

- Financial = (cash, paying for bills, fees, food, medicines)
- Physical = (household chores, transportation)
- Emotional = (social support, counselling, time with friends)
- Health = (providing health care - administering medicines, changing bandages, arranging health care providers)

CAREGIVING TO CHILDREN IN THE HOUSEHOLD

The following questions ask about care you provide or have provided to children in the household over the last 12 months - specifically care provided to children aged 15 years or younger for whom one or both parents are ill or absent (*prolonged illness or absent through death or migration or other reason*). Care could be related to physical care, health care, financial support or other reasons, where you are responsible for the well-being of the child/children.

Q8028	Has anyone in your household provided care for any child aged 15 or under in the household in the <u>last 12 months</u> ?	1 YES 2 NO→	Q8047
Q8028a	In total, how many <u>child</u> household (HH)	<input type="text"/> <input type="text"/>
