Brief summary of education, skills, and experience as it relates to the guideline under development

Maria has extensive experience in infection prevention and control and public health response to outbreaks, mass gatherings, and other emergencies affecting the health sector. For eight years, she was the Field Coordinator for the Malaria Active-Case Detection programmes, which run during annual transmission seasons in Greece and include the following activities:

- Development and coordination of the system for active case detection of malaria cases in various areas in Greece
- Supervision of the distribution, training and use of Long Lasting Insecticidal Nets in the local migrant population in Peloponnese, Greece
- Coordinating the distribution of targeted mass antimalarial treatment for the years 2013-2025 to the local population of migrants with a team of health professionals and mediators in Evrotas area, Greece.
- Training public health staff and health care workers and the public on malaria
- Collaboration with vector control companies for local operational plans for malaria prevention.
- Collaboration with vector control companies for indoor residual spraying of the residences of the local migrant population in Peloponnese, Greece.

During her work with ECDC, Maria contributed to developing guidelines for COVID-19. In addition, she has experience in conducting systematic reviews.
