# The World Health Organization-Five Well-Being Index (WHO-5)

Romanian translation

The WHO-5 was developed during the 1990s by the late Per Bech of the Psychiatric Centre North Zealand (Copenhagen, Denmark), which hosted a WHO Collaborating Centre for Mental Health. The WHO-5 was derived from other scales and studies by the WHO Regional Office in Europe [1][2]. It has been translated, tested and used in a wide range of languages and settings across the globe [3].

In 2024 the Psychiatric Centre North Zealand and WHO agreed to assign copyright in the WHO-5 to WHO, thereby creating the opportunity to publish and disseminate the tool as a WHO open access product.

The translation displayed on the next page was completed before WHO accepted copyright of the English version in 2024. The translation was published on the website of the Psychiatric Centre North Zealand (Copenhagen, Denmark). WHO is not responsible for the content or accuracy of this translation. In the event of any inconsistency between the English and the translated version, the English version shall be the binding and authentic version.

## **Chestionarul OMS al celor 5 criterii de apreciere a starii de bine (versiunea 1998)**

Va rugam sa indicati pentru fiecare din urmatoarele afirmatii care este cea mai apropiata de cum v-ati simtit in ultimele doua saptamani. De notat ca valorile mai mari arata o mai buna stare. *Exemplu:* Daca v-ati simtit *vesela si bine dispusa in mai mult de jumatate de timp in ultimele doua saptamani*, marcati in patrat cu cifra 3 in coltul din dreapta sus.

<b>Ultimele doua saptamani</b>	<b>Tot timpul</b>	<b>Majoritatea timpului</b>	<b>Mai mult de jumatate din timp</b>	<b>Mai putin de jumatate din timp</b>	<b>Cateodata</b>	<b>Niciodata</b>
<b>1. M-am simtit vesel(a) si bine dispus(a)</b>	5	4	3	2	1	0
<b>2. M-am simtit calma si relaxata</b>	5	4	3	2	1	0
<b>3. M-am simtit activ(a) si in putere</b>	5	4	3	2	1	0
<b>4. M-am simtit proaspat(a) si odihnit(a) la trezire</b>	5	4	3	2	1	0
<b>5. Viata mea de zi de zi a fost plina de lucruri care m-au interesat</b>	5	4	3	2	1	0

### **Instructiuni de stabilire a scorului**

Pentru a calcula scorul chestionarului, adunati numerele trecute in coltul din dreapta sus al patratelor marcate si inmultiti suma obtinuta cu patru.

Veti obtine un scor intre 0 si 100. Un scor mai ridicat arata o mai buna stare.
