

Global Trans Fat Elimination 2022 Experience of The Sultanate of Oman

- Oman is implementing the GSO standard of Trans Fatty Acids (GSO 2483/2015 (E)) which limit the maximum amount allowed for trans fatty acid and declaring the trans fatty acid on the nutrition label per serving.
- Oman is implementing the GSO standard for Labeling of Prepackaged Food Stuffs (GSO 9/2013 (E)) which mandate labelling for prepacked food with detail ingredient and nutritive value of the food .
- The GSO standard of Traffic light labeling will be soon released and Oman will implement it with other Gulf country . ?? Enforce it by ministerial decree .
- Elimination of trans fat from locally manufactured bread is already done by some bakeries .
