

GPW 14

OUTPUT INDICATORS

Version: 14 May 2025

*The baseline and target values presented **are provisional** and subject to further validation. To ensure full alignment with the outcomes of the prioritization exercise, these figures will be reviewed and finalized through dedicated regional and country consultations following the Seventy-eighth World Health Assembly.*

1.1.1. WHO supports countries in developing health vulnerability and adaptation assessments, and national adaptation plans, and provides guidance, capacity-building and piloting of interventions to enhance the climate resilience of health systems through a One Health approach

UID		Baseline (Year)	Target (2026)	Target (2027)
798	Number of countries having conducted a climate change and health vulnerability and adaptation assessments and having developed the health component of their national adaptation plans	101 (2024)	123	140
826	Number of countries integrating meteorological information into surveillance and response systems for at least one climate-sensitive health risk (e.g. extreme heat, or climate-sensitive infectious disease) benefiting from WHO technical guidance or support	53 (2024)	68	79

1.2.1. WHO develops norms, standards, policy guidance and strengthens capacity in countries to reduce greenhouse gases and other pollutants from the health sector, and engage other sectors (such as food, transport, energy, education) to reduce their emissions

UID		Baseline (Year)	Target (2026)	Target (2027)
358	Number of countries with strengthened health sector capacity to understand the health risks of air pollution and evaluate the effectiveness of interventions using tools like health impact assessment, enabled by WHO	40 (2024)	50	50
359	Number of countries with national air quality standards aligned with WHO air quality guidelines	86 (2024)		89
569	Number of countries implementing national plans to develop a low-carbon and sustainable health system	14 (2025)	41	61

2.1.1. WHO supports countries in designing policies and regulations, shaping resource allocation and investment, building capacity and in establishing partnerships within and beyond the health sector to address social determinants and reduce health inequities, particularly for populations in situations of vulnerability

UID		Baseline (Year)	Target (2026)	Target (2027)
840	Number of countries implementing intersectoral policies, plans and strategies to advance health equity with WHO support	13 (2025)	25	38
1380	Number of countries adopting measures to address conflicts of interest/industry interference/commercial influence in public health policies and programming at national or subnational levels, with WHO technical assistance	6 (2024)	14	19

2.1.2. WHO supports countries in developing evidence-informed policies across sectors at all levels of government and adapts public health measures to meet the health needs of populations such as migrants and displaced people

UID		Baseline (Year)	Target (2026)	Target (2027)
295	Number of countries implementing at least two WHO-recommended measures to provide equitable health services for migrants, refugees and displaced populations	98 (2025)	194	194

2.2.1. WHO develops norms, standards and technical packages to address risk factors for communicable and noncommunicable diseases, violence and injuries, prevent poor nutrition and strengthen food safety and reduce environmental health risks, and supports countries in their implementation, including in the monitoring and development of legislation and regulations

UID		Baseline (Year)	Target (2026)	Target (2027)
328	Number of countries that have strengthened at least one PWER measure from the MPOWER technical package, enabled by WHO technical support	6 (2022)	39	39
797	Number of countries integrating WHO guidance on water, sanitation, hygiene and health in policies, plans, regulations or in monitoring systems	58 (2022)	65	70
1210	Number of countries adopting evidence-based legislative and policy reform to prevent and respond to violence against children, enabled by WHO technical support	4 (2025)	14	16
1329	Number of countries that have made a legislative or policy change to improve road safety, enabled by WHO technical support	6 (2022)	22	51
1382	Number of countries that have adopted technical support packages and guidance to tackle alcohol population-based policy measures, in line with WHO policies and resolutions	4 (2025)	6	8
1383	Number of countries with at least one of the following policies – national policy on physical activity; national policy on walking and cycling; national physical activity guidelines; national physical activity communications campaign; brief interventions on physical activity in primary healthcare–enabled by WHO technical support	33 (2023)	42	51

2.2.2. WHO supports countries to ensure comprehensive access to promotion and preventive health services to populations (such as tobacco and alcohol cessation services, physical activity counselling and nutrition counselling, including for breastfeeding), and to monitor their implementation

UID		Baseline (Year)	Target (2026)	Target (2027)
776	Number of countries reviewing or implementing new population-based alcohol policy measures, in line with WHO resolutions	3 (2025)	6	8
1386	Number of countries that have strengthened cessation services (i.e. O from MPOWER), enabled by WHO efforts	32 (2022)	39	39
1387	Number of countries with established multisectoral collaboration and communication mechanism for food safety events (SPAR score at least 4)	89 (2024)	116	135
1388	Number of countries having adopted a policy package to achieve all targets included in the comprehensive implementation plan on maternal, infant and young child nutrition, enabled by WHO efforts	71 (2025)	73	73
1502	Number of countries implementing national policies to eliminate trans-fatty acids from the food supply and reduce sodium and sugars consumption, in alignment with WHO guidelines, best-practice and technical packages	28 (2025)	32	32

2.3.1. WHO develops guidance and supports countries to strengthen their capacity to engage with and empower individuals and communities, and all levels of government across sectors to increase health literacy, enable healthier behaviours, advance co-benefits, and improve governance and implementation of settings-based approaches and health promotion policies

UID		Baseline (Year)	Target (2026)	Target (2027)
804	Number of countries that have implemented a national or subnational healthy settings policy or programme aligned with WHO guidance, or with or through WHO technical support	90 (2025)	115	128
807	Number of countries with national or subnational policies on promoting health and well-being that have integrated a comprehensive health promotion approach, aligned with WHO guidance, or with or through WHO technical support	76 (2025)	93	107

3.1.1. WHO strengthens country capacity and provides guidance on the design, delivery, quality and measurement of integrated -services

UID		Baseline (Year)	Target (2026)	Target (2027)
481	Number of countries that have developed or updated existing quality of care and patient safety strategies/plans, based on WHO guidance	56 (2025)	64	78
482	Number of countries that have strengthened monitoring of access to equitable and quality health services, based on WHO guidance	42 (2025)	55	56
483	Number of countries that have an integrated universal health coverage package of priority services that meets core WHO criteria	38 (2025)	63	75

3.1.2. WHO strengthens national institutional capacities for essential public health functions and improve the resilience of health systems

UID		Baseline (Year)	Target (2026)	Target (2027)
1339	Number of countries with defined multisectoral coordination mechanism(s) for the delivery of essential public health functions and public health services	49 (2025)	64	75
1389	Number of countries that have incorporated the service-oriented essential public health functions within their universal health coverage package of health services (or equivalent)	63 (2025)	71	82

1390	Number of countries reporting on key public health occupations across health and allied sectors through the National Health Workforce Accounts (NHWA)	24 (2025)		50
------	---	-----------	--	----

3.1.3. WHO strengthens countries' national capacity to develop implementable national strategies for UHC

UID		Baseline (Year)	Target (2026)	Target (2027)
491	Number of countries that have a national health sector policy/strategy/plan updated within the last five years, with WHO support	64 (2024)	82	97
492	Number of countries that have assessed the progress of their national health policy/strategy/plan based on baseline and targets in the last two years, with WHO support	47 (2023)	57	61
493	Number of countries that have advanced social participation, with WHO support	64 (2023)	78	88
1391	Proportion of tracer countries with new or revised national health laws, policies, strategies and plans that incorporate gender equality, human rights and equity considerations, in line with WHO guidance and tools			40%

3.2.1. WHO provides technical guidance and operational support to countries to optimize and expand their health and care workforce

UID		Baseline (Year)	Target (2026)	Target (2027)
494	Number of countries implementing the NHTA and reporting data through the NHTA data platform	72 (2025)		100
495	Number of countries reporting on health worker migration through the NHTA	74 (2025)		90
496	Number of countries reporting on the production of health and care workers	90 (2025)		120

3.2.2. WHO generates evidence, guides design and supports health-related macroeconomic policies and practices for sustainable health financing

UID		Baseline (Year)	Target (2026)	Target (2027)
497	Number of countries showing evidence of progress in health financing policies for universal health coverage as a result of WHO support	39 (2024)	41	42
500	Number of countries applying WHO-recommended approaches on economic evidence for planning, decision-making and resource allocation (including priority-setting, economic evaluation, costing, investment cases and plans, defining health benefit packages or health technology assessment) as a result of WHO engagement	23 (2023)	35	47

3.2.3. WHO supports countries to implement measures for better access to, and use of, safe, effective and quality-assured health products

UID		Baseline (Year)	Target (2026)	Target (2027)
190	Number of countries with a list of essential medicines (or reimbursed medicines) developed centrally (national or regional), updated within the last five years and grounded in the concept of the WHO Model List of Essential Medicines	68 (2025)	71	75
507	Number of in-country registrations of prequalified products and SRA/WLA approved products registered under the Collaborative Registration Procedure or other facilitated reliance pathway in case of emergency	1476 (2024)	1576	1676
749	Number of Member States with an established institutional development plan to improve regulatory capacity for health products, based on assessment using the WHO global benchmarking tool	39 (2024)	43	48

3.3.1. WHO builds country capacity and develops tools and platforms to support countries in developing and improving their national digital health and health information systems to improve resilience, coverage, equity and impact

UID		Baseline (Year)	Target (2026)	Target (2027)
811	Number of countries with a digital health strategy and/or a road map	144 (2024)	161	174
1373	Number of countries that have demonstrably improved their health information system capacity and increased their country assessment scores using the SCORE for Health Data technical package	130 (2024)	157	164

4.1.1. WHO develops evidence-based policies and supports the implementation, scale-up and measurement of best buys and other actions to strengthen person-centered prevention, control and management of noncommunicable diseases

UID		Baseline (Year)	Target (2026)	Target (2027)
1000	Number of countries that have completed a WHO STEPS survey or an equivalent risk factor survey aligned with WHO standards, including physical and biochemical measurements of key behavioural and metabolic risk factors for noncommunicable diseases	31 (2023)		
1009	Number of countries with evidence-based national guidelines/protocols/standards aligned with WHO guidance for the management of major noncommunicable diseases through a primary care approach	111 (2023)		
1020	Number of countries implementing an action plan or strategy aligned with the WHO global strategy to accelerate the elimination of cervical cancer as a public health problem	135 (2023)		
1207	Number of countries that have implemented disability inclusion measures in national health programmes and strategies	14 (2025)	23	33
1377	Number of countries with patient information systems reporting noncommunicable diseases indicators aligned to WHO guidance	140 (2023)		

4.1.2. WHO supports the design, scale-up, implementation and measurement of the coverage of people-centred, equitable services for key mental health, neurological and substance use conditions

UID		Baseline (Year)	Target (2026)	Target (2027)
114	Number of countries that have integrated the WHO mental health gap action programme	96 (2024)	101	111
122	Number of countries that have updated or developed a national strategy and/or action plan for mental health or the prevention of suicide	134 (2024)	144	148
740	Number of countries with improved availability and reporting of service coverage data for mental, neurological and substance use tracer conditions	122 (2024)	127	134

4.1.3. WHO provides leadership, develops evidence-based guidance and standards, and supports Member States to build capacity for delivery of targeted, innovative and integrated people-centred services for communicable diseases

UID		Baseline (Year)	Target (2026)	Target (2027)
487	Percentage of countries confirmed by WHO to have met WHO criteria for disease elimination for at least one disease	13% (2023)	16%	18%
1378	Percentage of countries that have adopted policies in line with current WHO norms and standards to address endemic communicable diseases (HIV, TB, malaria, neglected tropical diseases (NTDs), hepatitis, sexually transmitted infections (STIs))	52% (2023)	58%	64%
1379	Percentage of countries reporting on WHO-recommended indicators for endemic communicable diseases (HIV, TB, malaria, NTDs, hepatitis, STIs)	74% (2023)	81%	87%

4.1.4. WHO develops and disseminates guidance and tools to mitigate antimicrobial resistance, collects and reports data for action, raises awareness, guides research and innovation, builds country and regional capacity to implement a core package of interventions, and coordinates global multisectoral action

UID		Baseline (Year)	Target (2026)	Target (2027)
212	Number of countries implementing and monitoring government-endorsed multisectoral antimicrobial resistance national action plans based on WHO guidance with necessary financing	125 (2024)	128	132
518	Number of countries with an antimicrobial resistance surveillance system in place and providing data to the WHO Global Antimicrobial Resistance and Use Surveillance System (GLASS), based on WHO guidance and protocols	105 (2025)	115	126
519	Number of countries with national systems in place to monitor the use of antimicrobials in human health and reporting to the GLASS, based on WHO guidance and protocols	140 (2024)	150	160

4.2.1. WHO provides guidance and technical assistance to improve sexual, reproductive, maternal, newborn, child, adolescent, adult and older person health

UID		Baseline (Year)	Target (2026)	Target (2027)
728	Number of countries that have integrated care for older people at community and primary health care level using the WHO ICOPE package for the assessment and management of impairment in the intrinsic capacity of older people	17 (2024)	34	47
1225	Number of countries that have a strategic plan (whose development was supported by WHO) whose end date has not expired for two or more areas of sexual, reproductive, maternal, newborn, child and adolescent Health	106 (2023)	109	111
1226	Number of countries that have an active UN H6 partnership for sexual, reproductive, maternal, newborn, child and adolescent health that met at least once in the past year	59 (2023)	69	72

4.2.2. WHO provides guidance and technical assistance to strengthen and sustain quality immunization services, including for poliomyelitis, especially for unvaccinated and under-vaccinated persons

UID		Baseline (Year)	Target (2026)	Target (2027)
1007	Number of countries submitting immunization coverage data to WHO through the eJRF platform	183 (2023)		
1407	Number of countries in which the national immunization strategy includes implementation progress reviews of annual operational plans addressing either (a) zero-dose children or (b) measles vaccine coverage or (c) human papillomavirus vaccine coverage	25 (2023)	61	70

4.3.1. WHO provides guidance and technical assistance and strengthens capacity to track health expenditures at the system level to monitor financial hardship and financial barriers to access and inform decision-making for financial and social health protection

UID		Baseline (Year)	Target (2026)	Target (2027)
498	Number of countries producing health accounts, based on WHO-supported methodologies	75 (2024)	77	81
499	Number of countries with an updated analysis of financial protection, as a result of WHO engagement	80 (2018)	86	86

5.1.1. WHO collaborates with partners to communicate risks and engage with communities to co-create public health prevention and response interventions for all hazards

UID		Baseline (Year)	Target (2026)	Target (2027)
1139	Number of countries with formalized all-hazard emergency risk communication mechanisms at the national level with the ability to proactively engage with the public and affected communities in local languages	31 (2024)	37	43

5.1.2. WHO provides technical expertise and operational support to strengthen and scale preventive population and environmental public health interventions for all hazards, utilizing a One Health approach

UID		Baseline (Year)	Target (2026)	Target (2027)
1374	Number of countries implementing frameworks, evidence-based guidance or tools to operationalize a One Health approach enhancing prevention, early detection, and containment of emerging zoonotic pathogens with epidemic and pandemic potential			5

5.2.1. WHO conducts risk and capacity assessments and supports the development and implementation of national preparedness and readiness plans, including tailored prevention and mitigation strategies for specific hazards

UID		Baseline (Year)	Target (2026)	Target (2027)
297	Number of countries with epidemic and pandemic prevention and preparedness plan, as well as prevention and control programme, for at least one pathogen of epidemic and pandemic potential	8 (2023)	77	97
820	Number of States Parties completing annual reporting on the International Health Regulations (2005)	193 (2024)	194	194
824	Number of countries that have completed an action review or simulation exercise to review national system capacities and inform national action plans	124 (2024)		

5.2.2. WHO establishes and manages collaborative research networks for fast-track research and development, scalable manufacturing and resilient supply chain systems to enable timely and equitable access to medical countermeasures during health emergencies

UID		Baseline (Year)	Target (2026)	Target (2027)
1375	Percentage of medical countermeasures for high-threat pathogens delivered through an internationally agreed and equitable access allocation mechanism (e.g. the Access and Allocation Mechanism or the International Coordinating Group on Vaccine Provision)	65% (2024)	70%	75%
1410	Number of research and development and innovation road maps for product and medical countermeasures developed for high-priority viral families using collaborative open research consortia	0 (2025)	21	43

5.2.3. WHO provides technical expertise and operational support to strengthen and scale clinical care for emergencies, including infection prevention and control measures to protect health workers and patients

UID		Baseline (Year)	Target (2026)	Target (2027)
1152	Number of countries with multisectoral, multidisciplinary national costing system plans being evaluated			
1154	Number of countries having standards available for IPC, WASH and waste in healthcare facilities	76 (2025)	96	112

6.1.1. WHO strengthens surveillance and alert systems, including diagnostics and laboratory capacities, for the effective monitoring of public health threats and the rapid detection, verification, risk assessment and grading of public health events

UID		Baseline (Year)	Target (2026)	Target (2027)
1156	Percentage of critical acute public health events for which a formal initial rapid risk assessment and grading are completed within one week	50% (2024)	60%	70%
1159	Number of countries that have demonstrated laboratory capabilities to test and sequence for priority pathogens of epidemic and pandemic potential			161

6.1.2. WHO coordinates rapid and effective responses to acute public health threats, including deploying multisectoral response capacities, surging emergency supplies and logistics support, providing contingency financing, and implementing strategic and operational response plans

UID		Baseline (Year)	Target (2026)	Target (2027)
547	Percentage of approved requests for emergency medical supplies and/or equipment ready to ship within 7 days of the approval of the emergency request	77% (2024)	80%	85%
1161	Percentage of newly graded emergencies for which the incident management system is activated at least at country level within 72 hours, with focal points for key functions identified and a contingency fund for emergencies released, where appropriate	33% (2025)	70%	95%
1358	Number of countries with classified or nationally validated emergency medical teams	39 (2024)	75	93

6.2.1. WHO coordinates and leads the health cluster or sector and partners to assess health needs and develop, fund and monitor humanitarian health emergency response plans in humanitarian emergencies

UID		Baseline (Year)	Target (2026)	Target (2027)
548	Percentage of countries facing humanitarian emergencies (with dedicated country appeals within the Global Humanitarian Overview) that have received at least 50% of its funding needs	24% (2024)	30%	35%

6.2.2. WHO ensures the provision of life-saving care and maintains essential health services and systems in emergencies and vulnerable settings, addressing barriers to access and inequity

UID		Baseline (Year)	Target (2026)	Target (2027)
1171	Number of countries facing humanitarian emergencies (with a humanitarian response plan as per the Global Humanitarian Overview) with a context-adapted service package for a humanitarian response that meets WHO criteria	6 (2024)	63	
1174	Percentage of countries facing humanitarian emergencies with periodic reporting on functionality of health facilities and availability of health services	19% (2024)	100%	100%

7.1.1. Convening, advocating and engagement with Member States and key constituencies in support of health governance and to advance health priorities

UID		Baseline (Year)	Target (2026)	Target (2027)
618	Percentage of United Nations System-wide Action Plan on Gender Equality and the Empowerment of Women and United Nations Disability Inclusion Strategy indicators that WHO met or exceeded in the last reporting period	47% (2025)	65%	76%
1392	Percentage of WHO offices/departments that have conducted capacity-strengthening activities on gender equality, human rights and health equity for WHO staff and/or external stakeholders in the last calendar year	49% (2024)	54%	57%

7.1.2. Effectively communicating to promote evidence-informed planning for decision-making for interventions and healthy behaviours in countries

UID		Baseline (Year)	Target (2026)	Target (2027)
1363	Number of communication strategies with clear roles and responsibilities across all WHO country offices	41 (2025)	85	100

7.1.3. Effective results-based management realized through a sustainably financed programme budget aligned with evidence-informed country, regional and global priorities, supported by transparent resource allocation and robust monitoring and performance assessment

UID		Baseline (Year)	Target (2026)	Target (2027)
609	Percentage of budget centres that have completed WHO's performance assessment of the programme budget	25% (2023)		
714	Percentage of high priority outputs funded up to 80% of their planned budget	58% (2021)	70%	80%
715	Percentage of base budget financed by flexible and thematic voluntary contributions	51% (2023)	55%	60%
854	Percentage of countries that have conducted a joint assessment to validate the Secretariat's achievements under the WHO results framework	17% (2024)	30%	30%
1501	Percentage of base budget financed by donors other than the 10 largest donors	35.6% (2024)	39.2%	39.8%
1503	Number of major offices whose funding level for the approved base budget is at least 80%	3 (2023)	5	6

7.2.1. Evidence-based and quality-assured normative products, including the living approach, are developed with and for countries, are digitally accessible and used for health, policy and practice impact

UID		Baseline (Year)	Target (2026)	Target (2027)
1395	Percentage of WHO guidelines developed or updated using the living approach to evidence, with documented mechanisms that facilitate timely dissemination for country use	10% (2025)	20%	30%
1396	Number of WHO norms, standards and guidelines that support the adoption of digital technologies (including SMART Guidelines and guidance on AI) made accessible to countries	73 (2025)	92	112

7.2.2. Strengthening national and regional science ecosystems to improve health and provide opportunities and equity, active support for the digital health transformation, research, development and innovation, including manufacturing capacities of countries

UID		Baseline (Year)	Target (2026)	Target (2027)
589	Number of countries that have established an evidence-to-policy process following WHO facilitation or recommendations	57 (2025)	61	73

7.2.3. WHO supports Member States in strengthening health information collection, aggregation, analysis and interpretation to monitor trends and progress towards indicators and targets of the Sustainable Development Goals, including inequality monitoring

UID		Baseline (Year)	Target (2026)	Target (2027)
579	Number of countries in which national health information systems have been strengthened using WHO-provided analytical platforms, leading to improved availability and disaggregation of GPW 14 outcome indicators and better use of indicators included in the Global Health Estimates, World Health Statistics and the Health Inequality Data Repository for decision-making	136 (2024)	139	144
1370	Number of countries using the delivery-for-impact approach to identify priorities, develop acceleration scenarios and allocate resources to achieve national or global targets	35 (2024)		
1371	Number of countries implementing and utilizing the International Classification of Diseases, 11th Revision (ICD-11) to record accurate and key population health information, with level of implementation	181 (2024)	194	194
1372	Number of countries accessing data.who.int public data assets in support of evidence-informed decision-making	10 (2024)	194	194

8.1.1. Policies, rules and regulations in place to attract, recruit and retain a diverse, empowered and fit-for-purpose workforce, operating in a respectful and inclusive workplace with organizational change fully institutionalized

UID		Baseline (Year)	Target (2026)	Target (2027)
603	Number of budget centres that have completed the annual prevention of and response to sexual misconduct risk assessment and mitigation exercise	150 (2025)	180	190
611	Percentage of global workforce responding to annual Organization-wide survey on culture, diversity, equity, inclusion, motivation, work environment, management, accountability, capabilities, innovation and learning			
626	Percentage of female staff members at the P4 level and above	44.7% (2023)	50%	50%
628	Percentage of staff from unrepresented and under-represented countries	29.9% (2024)	50%	50%
629	Percentage of workforce holding different contract types	21.2% (2024)		

8.1.2. Core capacities of WHO country and regional offices strengthened to drive measurable impact at country level

UID		Baseline (Year)	Target (2026)	Target (2027)
613	Percentage of country offices with 80% of core predictable country presence positions filled	19% (2025)	23%	23%
627	Ratio of male to female WHO representatives, globally	35% (2025)	40%	40%
845	Percentage of country offices (by typology grouping) with an up-to-date Country Cooperation Strategy	66% (2025)	71%	76%

8.1.3. Accountability and legal functions enhanced in a transparent, compliant and risk management-driven manner, promoting organizational learning, effective internal justice, safety and impact at country level

UID		Baseline (Year)	Target (2026)	Target (2027)
598	Percentage of overdue internal audit recommendations	31% (2024)	90%	90%
599	Number of corporate evaluations linked to GPW 14 strategic objectives and corporate outcome	4 (2024)	4	6
600	Percentage of open critical risks with fully implemented risk response actions	25% (2025)	30%	30%
601	Percentage of agreed recommendations implemented within 24 months of evaluation completion	50% (2025)	60%	66%

8.1.4. Fit-for-purpose, cost-effective, innovative and secure corporate digital platforms and services aligned with the needs of users, corporate functions and technical programmes

UID		Baseline (Year)	Target (2026)	Target (2027)
630	Percentage of locations with harmonized and continuously adapted information technology infrastructure and digital workplace services	79% (2024)	83%	85%
632	Level of implementation of cybersecurity road map, in comparison with baseline established by the information technology security assessment	52% (2024)	57%	64%

8.1.5. Working environments, infrastructure, support services, supply chains and asset management are fit for purpose, accountable, cost-effective, innovative and secure for optimized operations

UID		Baseline (Year)	Target (2026)	Target (2027)
478	Percentage of compliance with security risk management measures and applicable security protocols and policies	92.53% (2024)	94%	95%
652	Percentage of procured goods and services obtained through competitive means	65% (2023)	70%	70%

8.1.6. Sound financial practices supported by an effective internal control framework to ensure transparency, accountability, and optimal financial management

UID		Baseline (Year)	Target (2026)	Target (2027)
619	Receipt of an unmodified audit opinion by the External Auditor on the yearly financial statements, driven by timely adherence to the financial closure processes and finance policies by WHO country offices/departments	100% (2024)	100%	100%
1368	Percentage of WHO regional directors and assistant directors-general compliant with the letter of representation, confirming the adequacy of internal controls	80% (2024)	100%	100%
