Global & Regional Situation

- Globally, as of 12 June 2022, there have been 532 677 229 (207 339) confirmed cases of COVID 19, including 6 306 670 (493) deaths reported to WHO through national authorities.
- Most of the cases have been reported from the USA, with 84 292 712 cases and 1 000 850 deaths, followed by India with 43 222 017 cases and the third-highest death count of 524 761. Brazil reported the third-highest case of 31 315 777 and the second-highest death of 667 647.

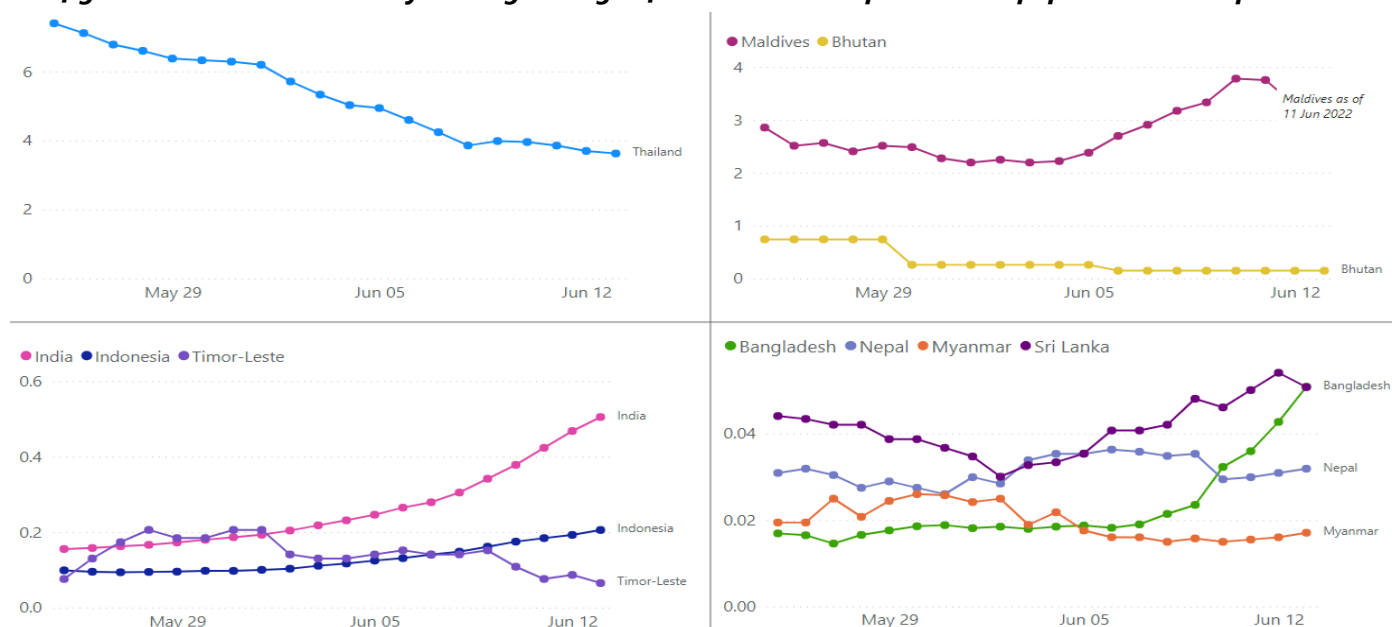

The map below shows the distribution of new cases of COVID-19 reported across the globe, as of 12 June 2022

Source: World Health Organization as of 12 June 2022

- The number of new weekly cases has continued the declining trend observed since a peak in January 2022. During the week of 6 June through 12 June 2022, over 2.8 million cases were reported. The number of new weekly deaths also continues to decline, with over 7.6 thousand fatalities reported.
- In the WHO South-East Asia Region, there were 67 795 new cases and 261 new deaths reported during the reporting week. Bangladesh (458 new cases), India (45 200 new cases), Indonesia (3 688 new cases), Sri Lanka (81 new cases) and Maldives (124 new cases) reported an increase in new cases, while the remaining countries reported a decline.

Bangladesh Situation:

1. Surveillance & Laboratory

- Between 8 March 2020 and 12 June 2022, **1 954 115** COVID-19 cases were confirmed by RT-PCR, GeneXpert, and Rapid Antigen tests, including **29 131** related deaths (**CFR 1.49%**).
- In the past week (epidemiological week 23, 2022), Bangladesh reported **458** new cases, while 210 cases reported in the week before; the case rate per 100 000 population per week is **0.27**. The country reported **no** new death in the reporting week.
- Health authorities are working to unravel the cause of this increase but call for vigilance and compliance with COVID-19 protocols

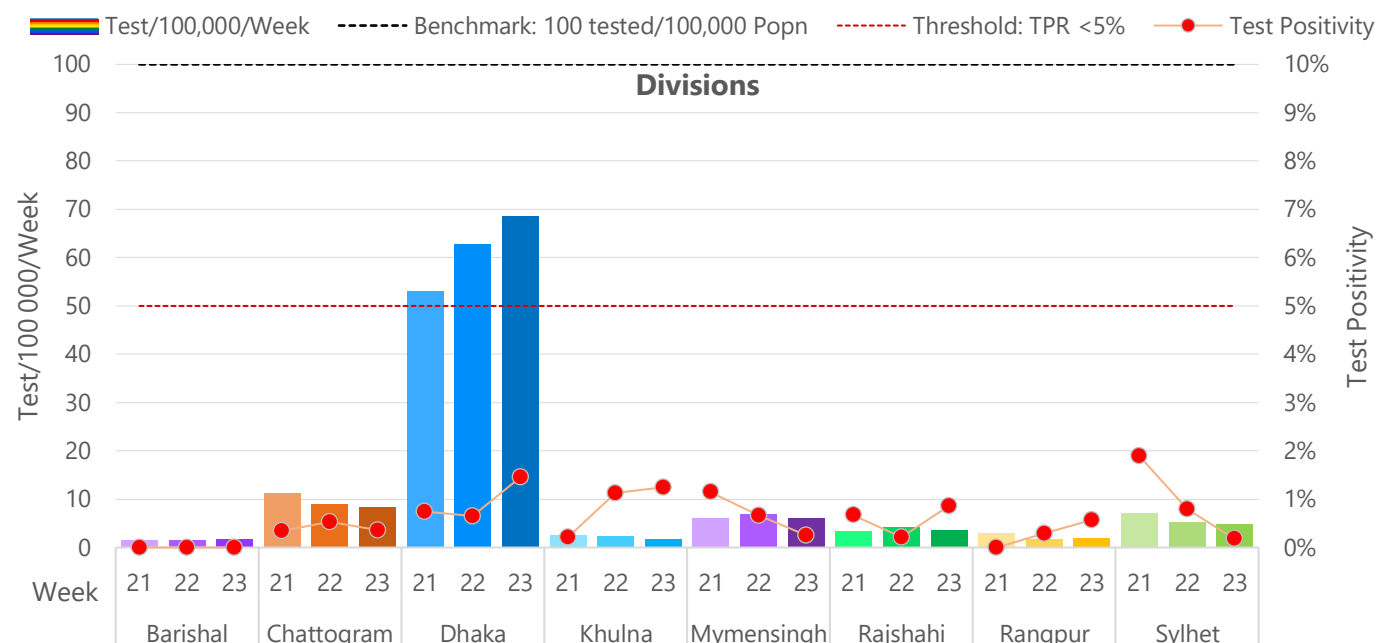

The graphs below show the daily Tests and TPR for COVID-19 in Bangladesh, 13 MAY - 12 JUN 2022

Source: COVID-19 Press Release, DGHS, MoHFW as of 12 June 2022

- The weekly new test is **35 377** (daily average: **5 054**), a **5.6% increase** compared to the previous week; the test rate per 100 000 per week is **20.8**; the weekly average test positivity rate (TPR) is **1.29%**, TPR **increased** by **106.5%** from the previous week. The overall Case Fatality Ratio (CFR) is stable at **1.49%**.

The graph below shows the Test Positivity Rate (TPR) and Test per 100 000/week in the last 3 weeks by division

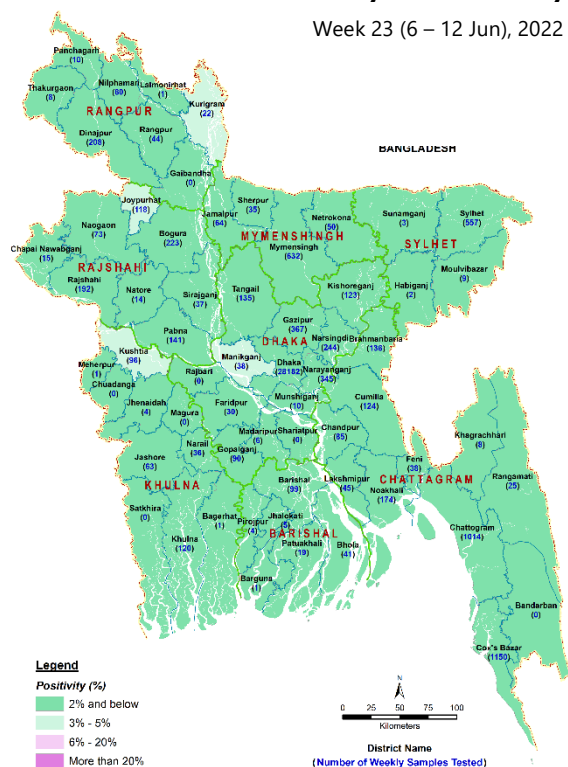

Source: COVID-19 Press Release, DGHS, MoHFW as of 12 June 2022

- As of 12 June 2022, according to the DGHS Press Release, **14 181 774** COVID-19 tests (RT-PCR **89.1%**, GeneXpert **0.9%**, and Rapid Antigen **10.0%**) were conducted in Bangladesh with an overall positivity rate of 13.78% and **2.06%** in the last 24 hours.
- Currently, there are **879** government or private laboratories/test centres in the country distributed as RT-PCR **56/160**, GeneXpert **54/57**, and Rapid Antigen **545/662**, respectively. Sixty six percent of all tests since the outbreak have been done in government facilities.
