1. Global Situation

Globally, as of 8:37 PM, 30 November 2020 there have been **62,363,527** confirmed cases of COVID-19, including **1,456,687** deaths received by WHO from national authorities. USA, the world's worst hit country, has counted **13,082,877** (143,211) cases with **263,946** (10,015) deaths as reported to WHO; followed by India with **9,431,691** (38,772) cases; while Brazil reported the third highest cases of **6,290,272** (51,922) and second highest deaths **172,561** (587) followed by India **137,139** (443) at the same cut off time.

The figure below is showing trend of the weekly number of reported COVID-19 cases by WHO region, 01 January – 30 November 2020

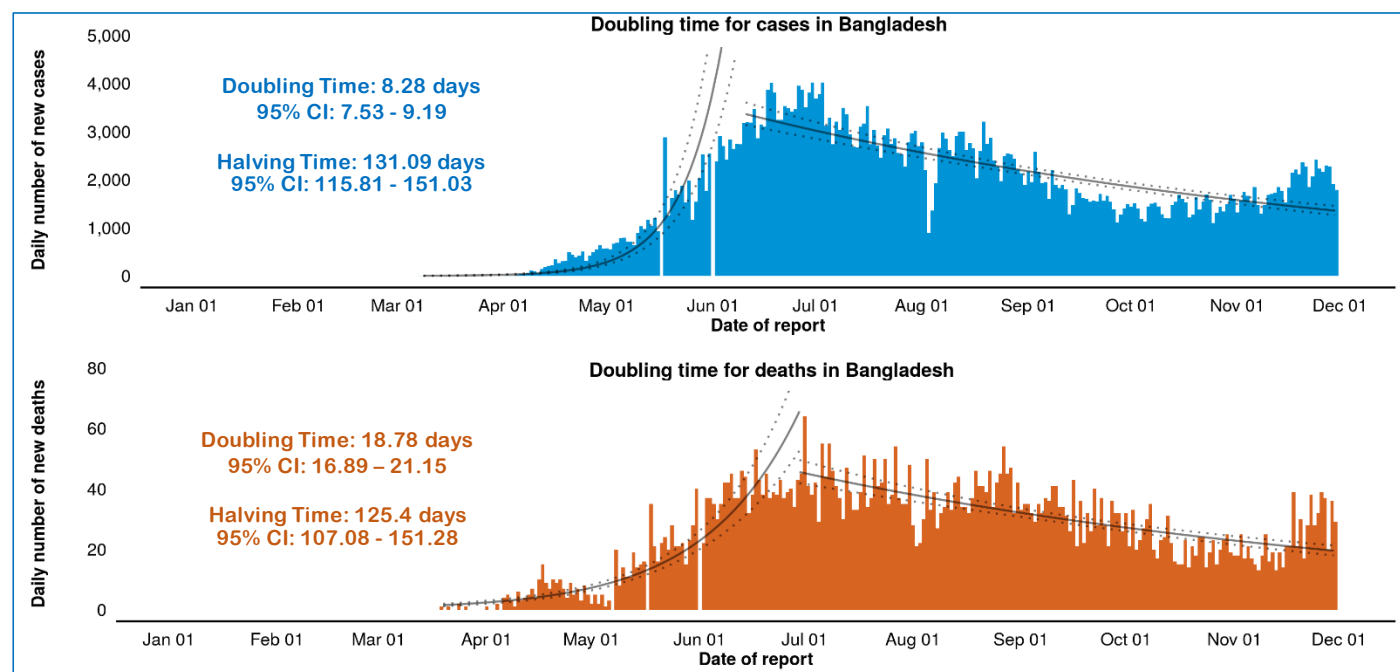

The figure below shows top ranked countries for total cases of confirmed COVID-19, deaths and new cases, 01 January – 30 November 2020

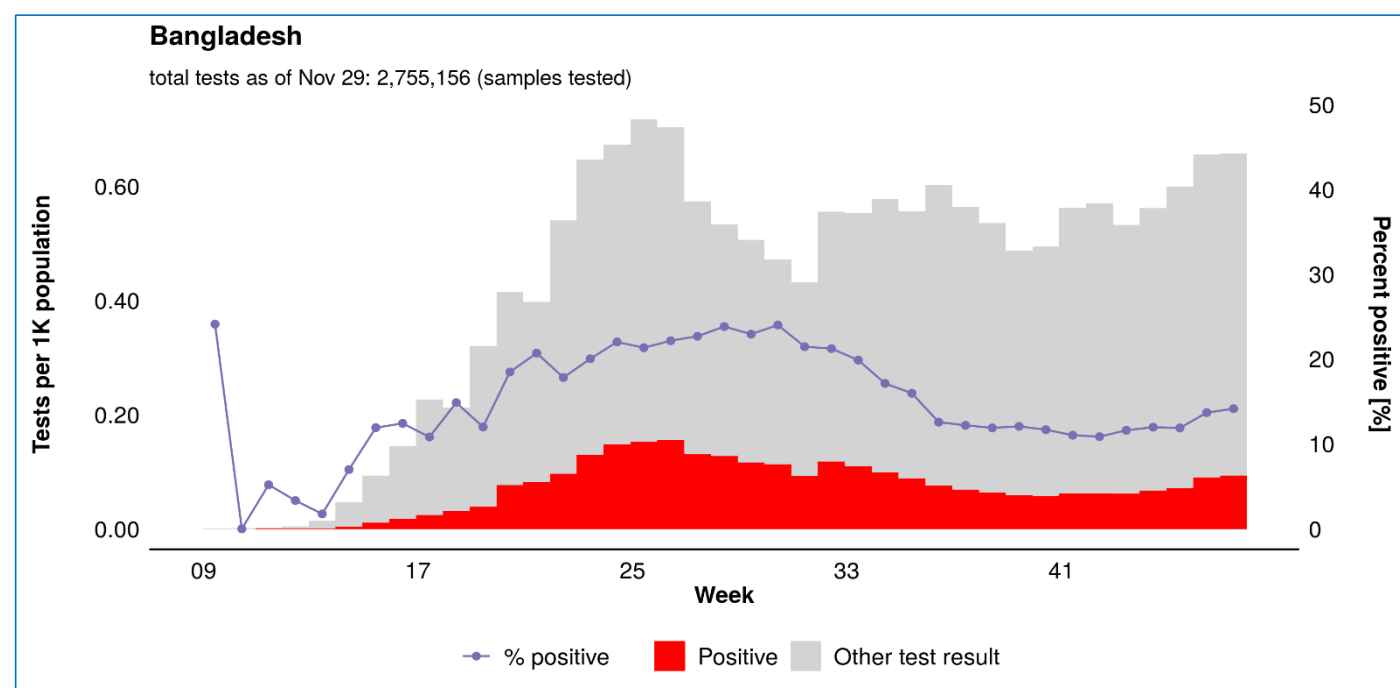

2. Bangladesh Situation

Between 8 March and 30 November 2020, according to the DGHS Press Release <<https://corona.gov.bd/press-release>> there were four hundred sixty-four thousand nine hundred thirty-two (**464,932**) COVID-19 confirmed by rRT-PCR, including six thousand six hundred forty-four (**6,644**) related deaths (**CFR 1.43%**). Bangladesh is the top 26th country in the world and accounts for **0.75%** of the COVID-19 disease burden in the world.

The figure below is showing the trend of COVID-19 cases and deaths, 08 March – 30 November 2020, Bangladesh

The figure below is showing the weekly test status and positivity of COVID-19, 08 March – 29 November 2020, Bangladesh

In the epidemiological week 48, number of new cases in Bangladesh is **15,066**; case per 100,000 population per week is **8.8**. New death is **221**; death per 100,000 per week is **0.13**. Weekly new tests is **108,169**; tests per 100,000 per week is **63.5**; weekly test positivity is **13.93**.

3. Surveillance & Laboratory

In the reported week (epidemiological week 48), in comparison to the previous epidemiological week, the number of new weekly COVID-19 cases **increased** by **0.4%** (**15,066** in week 48 and **15,008** in the previous week) while the number of COVID-19 new weekly deaths **increased** by **13.9%** (**221** and **194** respectively); Case Fatality Ratio (CFR) is **static** at **1.43** since last two weeks.

As of 30 November 2020, among the reported cases **26.6%** cases were confirmed in people between 31 and 40 years old, **19.6%** - in the age group of 21 to 30, **19.2%** - 41 to 50 years and **15.9%** in the age group between 51 and 60 years old. The highest death rate (**31.7%**) was reported in the age group of 61 to 70 years old, **29.6%** in the older age group of 71 and above and **22.3%** in the age group between 51 and 60 years. Male represented **72%** and **77%** of the of total reported confirmed COVID-19 cases and deaths respectively.

The table below is showing distribution of COVID-19 case and death, 08 March – 30 November 2020, Bangladesh

Division	Cumulative			Week 48		
	Cases	Death	CFR (%)	Cases	Death	CFR (%)
Dhaka	316,728	3,561	1.12	11,624	163	1.40
Chattogram	56,541	1,267	2.24	1,749	22	1.26
Khulna	23,853	496	2.08	287	8	2.79
Rajshahi	22,608	399	1.76	463	13	2.81
Rangpur	14,205	301	2.12	358	9	2.51
Sylhet	14,008	266	1.90	234	2	0.85
Barishal	9,846	222	2.25	220	4	1.82
Mymensingh	7,143	132	1.85	131	-	-
National	464,932	6,644	1.43	15,066	221	1.47

As of 30 November 2020, **68.1%** of reported cases were from **Dhaka** division, **12.2%** from **Chattogram**, **Khulna – 5.1%**, **Rajshahi – 4.9%**, **Sylhet – 3.1%**, **Rangpur – 3.0%**, **Barishal – 2.1%** and the lowest **1.5%** from **Mymensingh** division.

The figure below is showing the trend of COVID-19 Cases by division, 04 May – 29 November 2020, Bangladesh

While, **53.6%** of the reported death were from **Dhaka** division, **19.1%** from **Chattogram**, **Khulna – 7.5%**, **Rajshahi – 6.0%**, **Sylhet – 4.5%**, **Rangpur – 4.1%**, **Barishal – 3.3%** and the lowest **2.0%** from **Mymensingh** division.

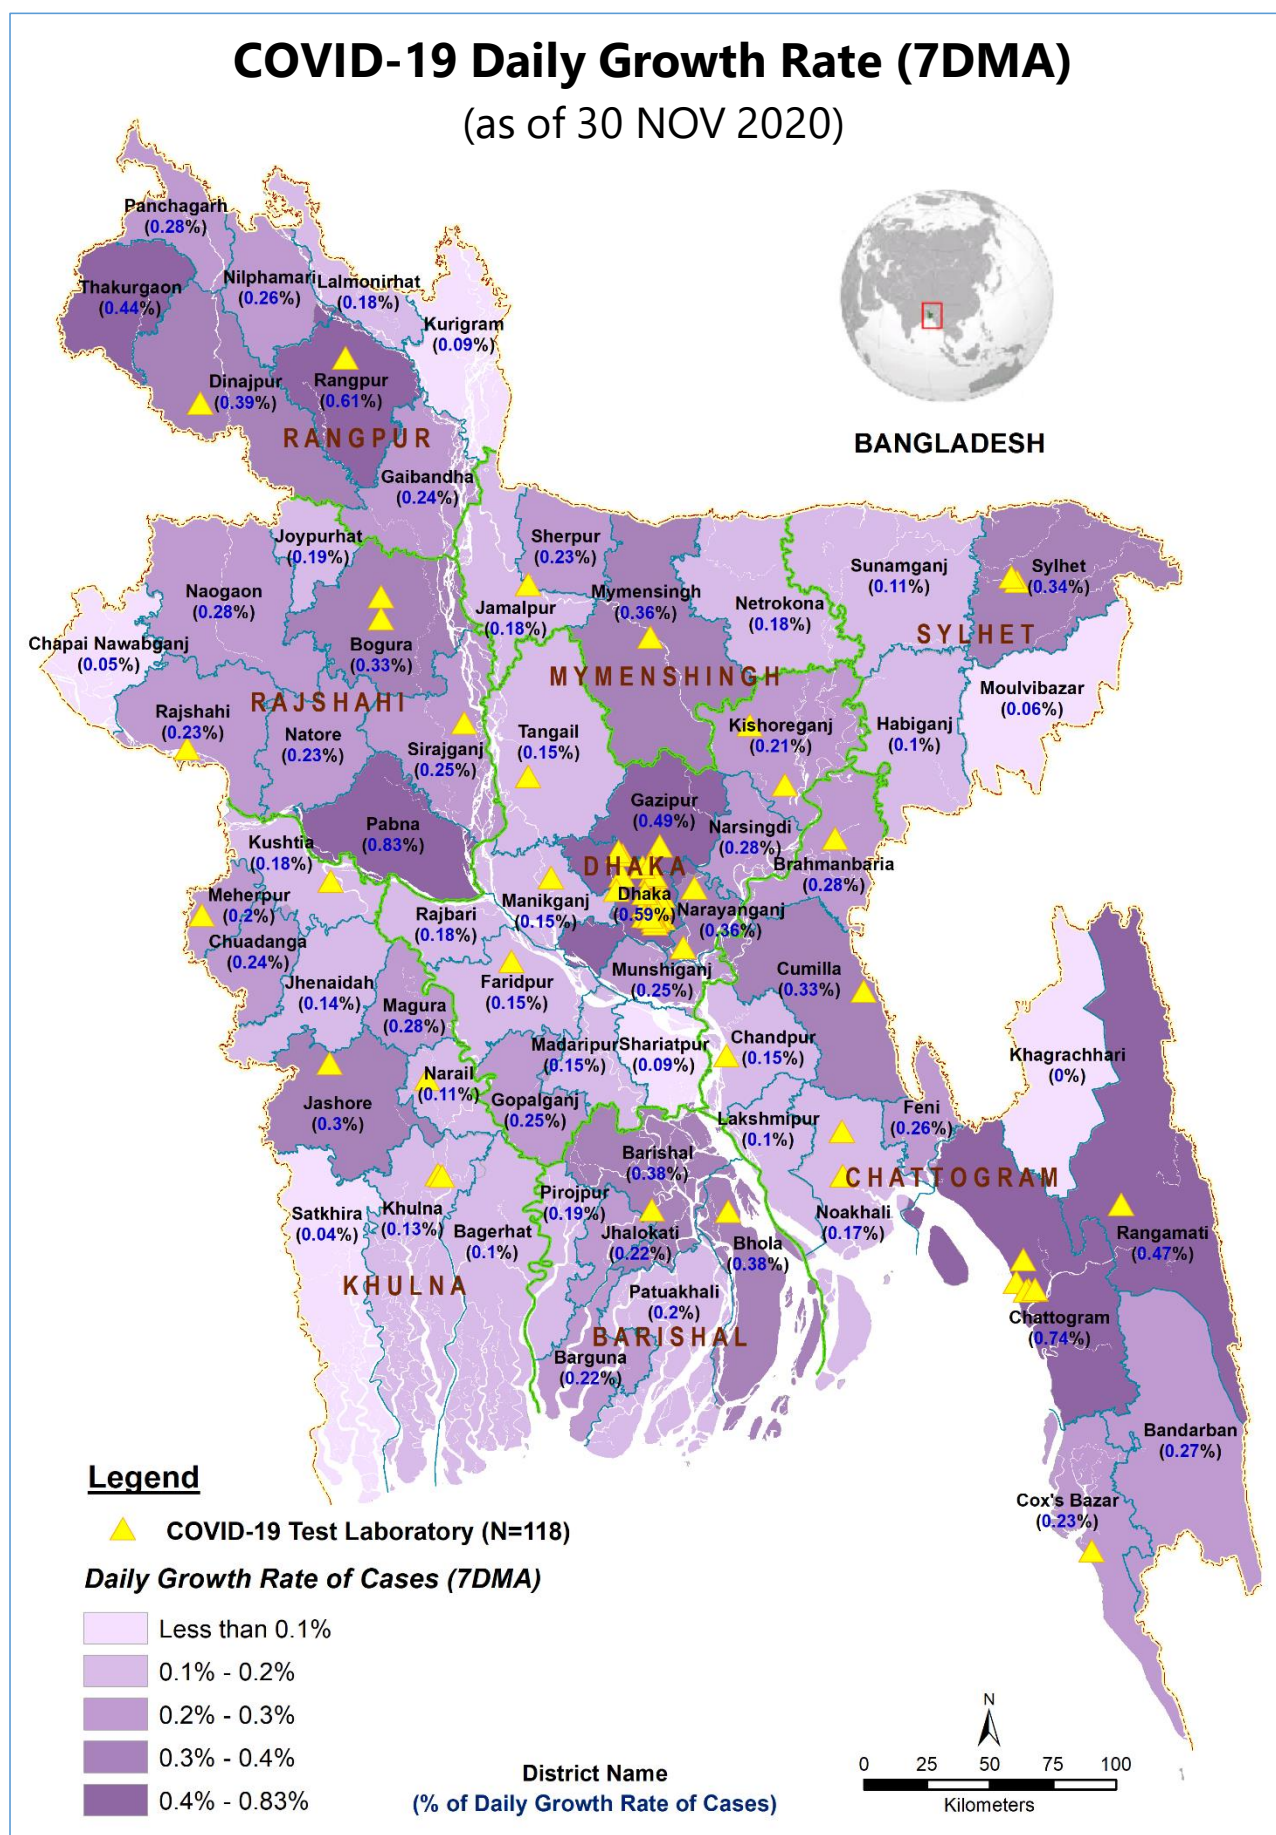

The highest number of weekly cases (**25,481**) reported in epi-week **26** (22 – 28 JUN 2020) while the highest weekly death (**314**) recorded in the following week **27** (29 JUN – 05 JUL 2020). During the last week cases increased in Sylhet by **55%**, Mymensingh – **48.9%**, Chattogram – **26.5%**, Rangpur – **11.9%**, Rajshahi – **7.7%**, Barishal – **2.3** and Khulna by **2.1%**; while cases reduced in Dhaka division by **4.3%** than the previous week.

As on 30 November 2020, overall attack rate (**AR**) in Bangladesh is **273** per 100,000 population and **100% (64/64)** of districts with the estimated total population of 170,306,468 have reported confirmed COVID-19 cases. In the reported week (week 47), COVID-19 weekly average **AR** (272/100,000) increased by **3.4%** from the previous week.

The table below is showing Attack rate per million by District, 08 March – 30 November 2020, Bangladesh

Out of the total **464,932** COVID-19 cases registered as of 23 November 2020, **81.9%** (380,711) **recovered**, **1.43%** (6,644) **died** and **16.69%** (77,577) are **active cases**. In the epidemiological week 48, weekly average number of COVID-19 **active cases** increased by **0.3%**, in comparison to the previous week (**76,632** and 76,426 respectively); during the same time, weekly **recovery** has increased by **22.2%** (**15,744** and 12,886 respectively).

The figure below is showing trend of COVID-19 cases by Outcome, 08 March – 30 November 2020, Bangladesh

As of 30 November 2020, according to the DGHS Press Release **2,772,701** COVID-19 tests were conducted in Bangladesh with the overall positivity rate of **16.77%** (**16.43%** in last 24 hours) by **118** laboratories; **68** laboratories (**57.6%**) in Dhaka and **50** laboratories (**42.4%**) from outside Dhaka. Two laboratories 'Kuwait Bangladesh Friendship Government Hospital' and 'Impulse Molecular Diagnostic Laboratory' joined in the network of COVID-19 testing laboratories since the last update. Total **62.1%** (**1,721,584/2,772,701**) of all samples were tested by the laboratories in Dhaka. As of 30 November 2020, test per case is **5.96** which indicates the number of tests required to identify 1 case.

The graph below is showing cumulative number of Samples tested and Positivity rate, 08 March – 30 November 2020, Bangladesh

The table below is showing distribution of test positivity rate by district, 16 – 30 November 2020, Bangladesh

Rangpur Div.	17.6%	Chattogram Div.	15.6%	Barishal Div.	14.0%	Dhaka Div.	13.9%

4. Points of Entry & Quarantine

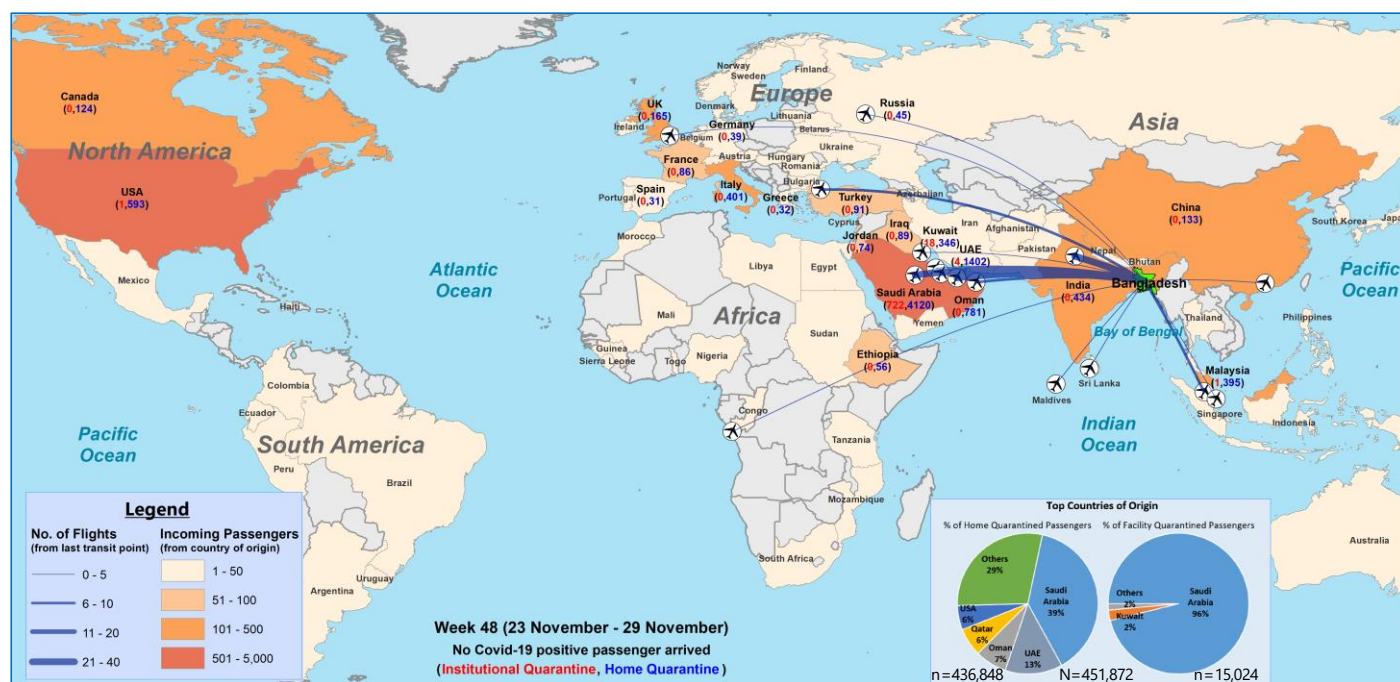

In the reported week (week 48), the number of international flights has increased by **3.4%**, in comparison to the previous week (**153** and **148** respectively) leading to increase in the number of incoming passengers by **5.4%** (**25,765** and **24,455** respectively). In the reported week **1,104** individuals were sent to Institutional Quarantine after passenger screening at the Hazrat Shahjalal International Airport (HSIA).

The figure below is showing the incoming flow of flights and passengers captured through PoE Surveillance, 26 April – 29 November 2020, Bangladesh

According to DGHS, as of 19 November 2020, the current institutional quarantine capacity in the country is represented by **629** centres across the 64 districts, which can receive **31,991** persons. A total of **41,677** individuals were placed in quarantine facilities and of them **36,704** (88.1%) have already been released. Over the same period, total of **91,245** individuals were isolated in designated health facilities and of them **78,379** (85.9%) have been released.

The map below is showing geographical distribution of incoming flights and travellers captured through PoE Surveillance, week 48, 2020, Bangladesh

The table below is showing distribution of incoming travellers in last 14 days (N=37,865) sent to Home Quarantine as captured through PoE Surveillance, 17 – 30 November 2020, Bangladesh
