## 1. Global Situation

Globally, as of 9:03pm, 31 January 2021, there have been 102,083,344 confirmed cases of COVID-19, including 2,209,195 deaths, reported to WHO by the national authorities. USA, the world's worst hit country, has counted **25,676,612** (164,415) cases with **433,173** (3,521) deaths as reported to WHO; followed by India with **10,746,183** (13,052) cases; while Brazil reported the third highest cases of **9,118,513** (59,826) and second highest deaths **222,666** (1,119) death followed by India **154,274** (127) at the same cut off time.

*The figure below is showing COVID-19 cases reported in last 24 hours, 31 January 2021*

*The figure below shows top ranked countries for total confirmed Cases, Deaths and New cases of COVID-19, 01 January 2020 – 31 January 2021*

## 2. Bangladesh Situation

Between 8 March 2020 and 31 January 2021, according to the DGHS Press Release <<https://corona.gov.bd/press-release>> there were five hundred thirty-five thousand one hundred thirty-nine (**535,139**) COVID-19 confirmed by rRT-PCR, GeneXpert and Rapid Antigen tests including eight thousand one hundred twenty-seven (**8,127**) related deaths (**CFR 1.52%**). Bangladesh is the top 31<sup>st</sup> country in the world and accounts for **0.52%** of the COVID-19 disease burden of the world.

The figures below showing trend of COVID-19 Cases and Deaths, 08 March 2020 – 31 January 2021, Bangladesh

The figures below showing COVID-19 cases and test positivity, 29 March 2020 – 31 January 2021, Bangladesh

In the epidemiological week 04, 2021, number of new cases in Bangladesh is **3,340**; case per 100,000 population per week is **2.0**. New death is **104**; death per 100,000 per week is **0.06**. Weekly new test is **96,164** (daily average: **13,738**); tests per 100,000 per week is **56.5**; weekly test positivity rate is **3.47%**.

### 3. Surveillance & Laboratory

In the reported week, in comparison to the previous epidemiological week, the number of new weekly COVID-19 case **decreased** by **19.8%** (3,340 in week 03 and 4,167 in the week before) and the number of COVID-19 new weekly death also **decreased** by **11.1%** (104 and 117 respectively); overall Case Fatality Ratio (CFR) **increase** to **1.52** which was 1.51 last week.

As of 31 January 2021, among the reported cases **26.4%** cases were confirmed in people between 30 and 39 years old, **19.6%** in the age group of 40 to 49, **18.0%** in 20 to 29 years and **16.7%** in the age group between 50 and 59 years old, **13.0%** in the age group 60 and above and **6.3%** in the age group below 20 years. The highest death rate (**32.4%**) in the older age group of 70 and above, **31.8%** was reported in the age group of 60 to 69 years, **20.8%** in 50 to 59 years, and **15.0%** in the age group of below 50 years. Male represents **71%** and **76%** of the total reported confirmed COVID-19 cases and deaths respectively.

**The figure below is showing Age-Sex distribution of COVID-19 case and death, 08 March 2020 – 31 January 2021, Bangladesh**

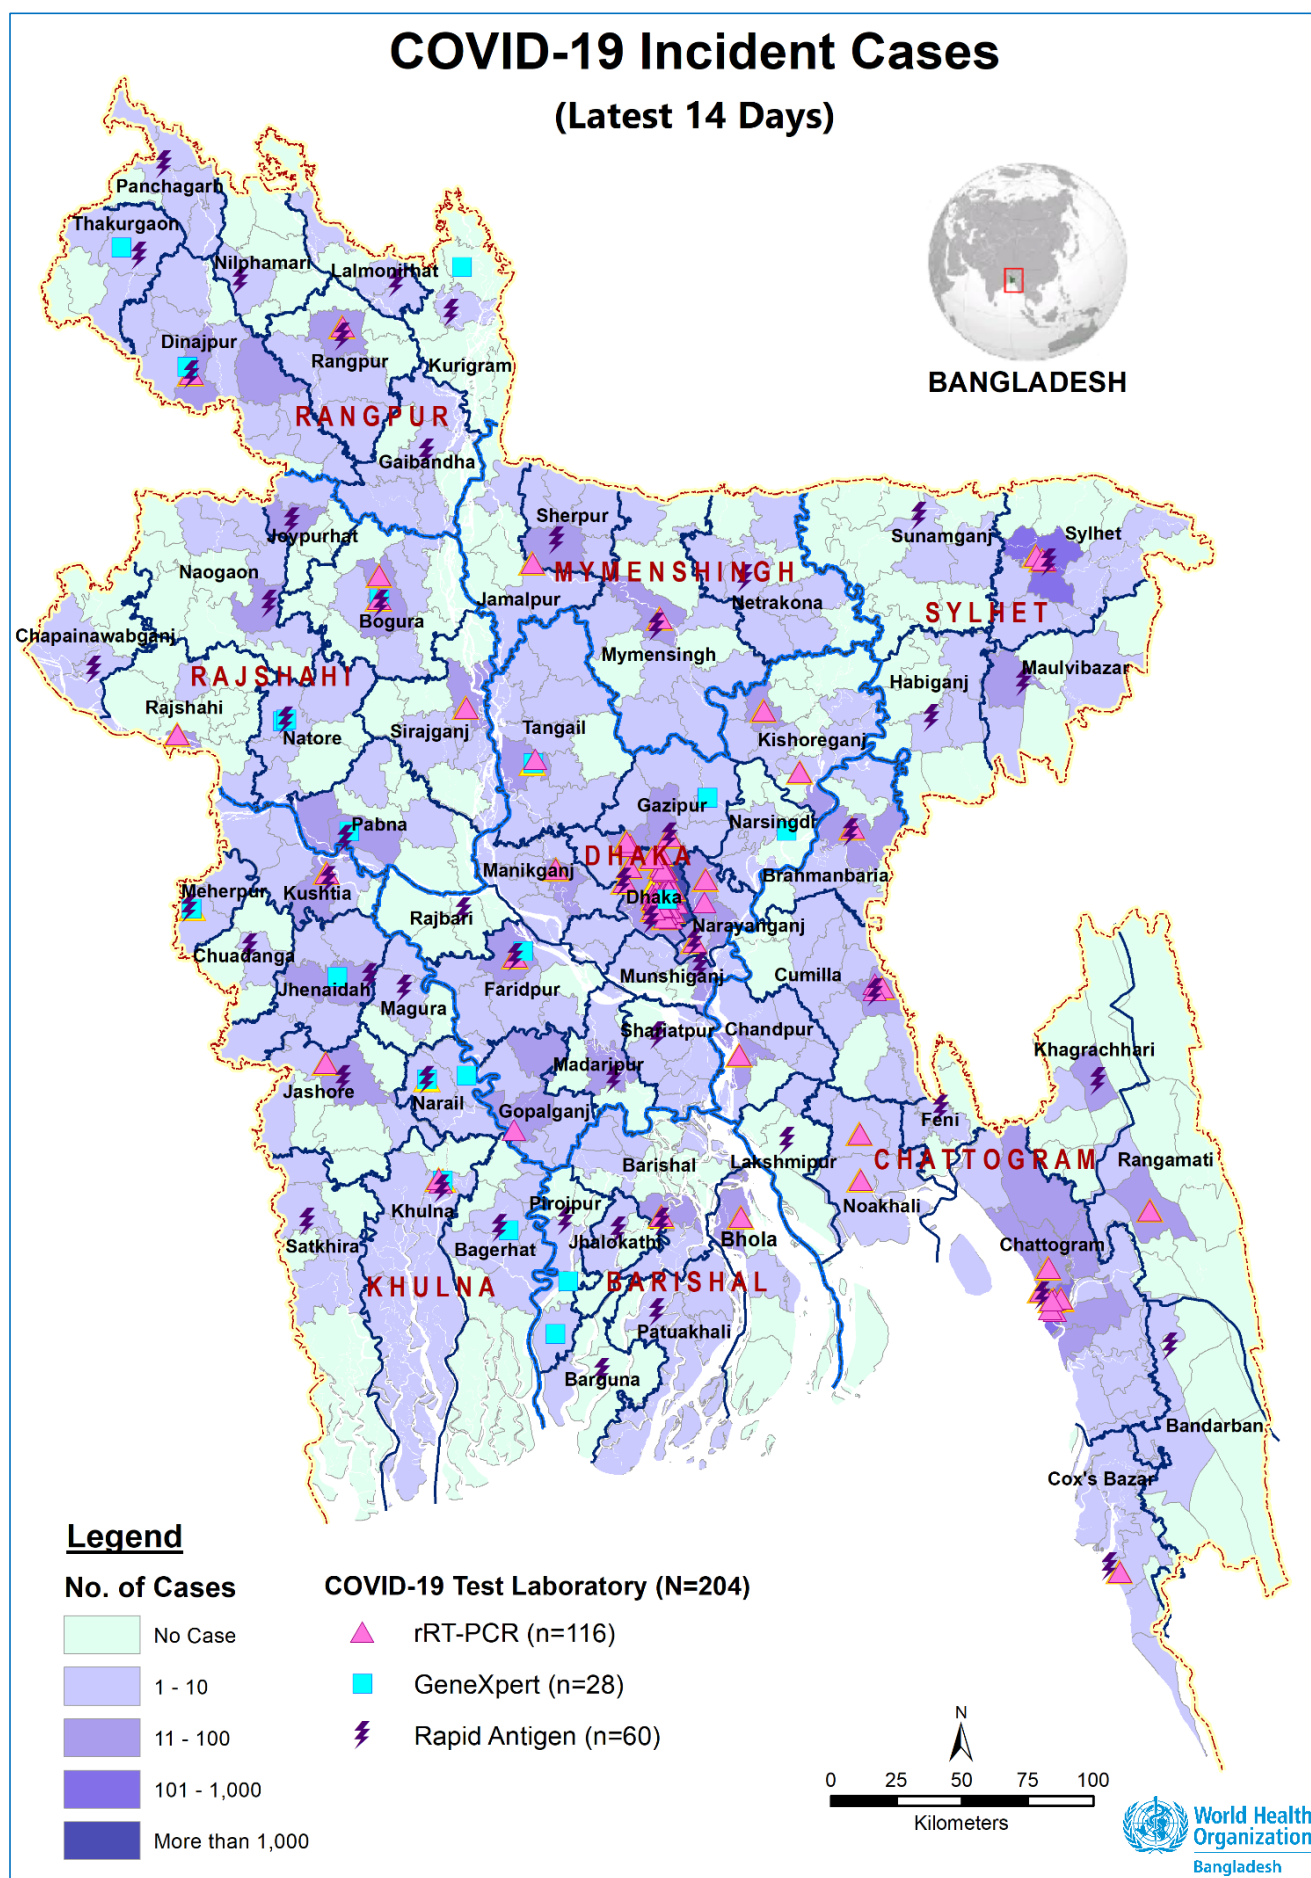

**The table below is showing distribution of COVID-19 case and death, 08 March 2020 – 31 January 2021, Bangladesh**

| Division   | Cumulative |       |         | Week 04, 2021 |       |         |
|------------|------------|-------|---------|---------------|-------|---------|
|            | Cases      | Death | CFR (%) | Cases         | Death | CFR (%) |
| Dhaka      | 368,458    | 4,521 | 1.23    | 2,358         | 61    | 2.59    |
| Chattogram | 66,567     | 1,504 | 2.26    | 531           | 22    | 4.14    |
| Khulna     | 25,362     | 549   | 2.16    | 70            | 5     | 7.14    |
| Rajshahi   | 25,220     | 456   | 1.81    | 121           | 5     | 4.13    |
| Rangpur    | 15,837     | 357   | 2.25    | 56            | 2     | 3.57    |
| Sylhet     | 15,306     | 304   | 1.99    | 118           | 3     | 2.54    |
| Barishal   | 10,637     | 248   | 2.33    | 52            | 4     | 7.69    |
| Mymensingh | 7,752      | 188   | 2.43    | 34            | 2     | 5.88    |
| National   | 535,139    | 8,127 | 1.52    | 3,340         | 104   | 3.11    |

The map below is showing geographical distribution of COVID-19 cases, 18 – 31 JAN 2021, Bangladesh

Contact tracing capacity at Institute of Epidemiology, Disease Control and Research (IEDCR) has been further strengthened with a ToT on Go.Data (Software for management of visualization of contact tracing data) supported by WHO and Global Outbreak, Alert and Response Programme (GOARN). A total of 90 Health personnel in 4 batches has been trained to facilitate outbreak investigation including field data collection, contact tracing.

As of 24 January 2021, **68.9%** of reported cases were from **Dhaka** division (**57.7%** at Dhaka city), **12.4%** from **Chattogram**, **Khulna – 4.7%**, **Rajshahi – 4.7%**, **Rangpur – 3.0%**, **Sylhet – 2.9%**, **Barishal – 2.0%** and the lowest **1.5%** from **Mymensingh** division. While, **55.6%** of the reported death were from **Dhaka** division (**29.4%** at Dhaka city), **18.5%** from **Chattogram**, **Khulna – 6.8%**, **Rajshahi – 5.6%**, **Rangpur – 4.4%**, **Sylhet – 3.7%**, **Barishal – 3.1%** and the lowest **2.3%** from **Mymensingh** division.

The highest number of weekly cases (**25,481**) reported in epi-week **26** (22 – 28 JUN 2020) while the highest weekly death (**314**) recorded in the following week **27** (29 JUN – 05 JUL 2020). In the reported week (week 04, 2021), COVID-19 daily average cases (**477**) decreased by **19.8%** from the week before. Weekly cases increased in only in Rangpur division by **15.7%**; while decreased in Rajshahi division by **42.4%** followed by Khulna – **26.3%**, Dhaka – **22.0%**, Barishal – **10.3%**, Chattogram – **9.4%** Mymensingh – **5.6%** and Sylhet – **3.4%** than the week before.

**The table below is showing top 10 districts of COVID-19 Cases, 14 December 2020 – 31 January 2021, Bangladesh**

| District/City | Cases per Week |       |       |       |       |       |       | Case per 100,000 per Week |      |      |      |      |      |      |
|---------------|----------------|-------|-------|-------|-------|-------|-------|---------------------------|------|------|------|------|------|------|
|               | 51             | 52    | 53    | 1     | 2     | 3     | 4     | 51                        | 52   | 53   | 1    | 2    | 3    | 4    |

**The figure below is showing status of COVID-19 cases and recovery, 15 MAR 2020 – 31 JAN 2021, Bangladesh.**

Out of the total **535,139** COVID-19 cases registered as of 31 January 2021, **89.6%** (472,437) **recovered**, **1.52%** (8,127) **died** and **8.83%** (47,268) were **active cases**. In the epidemiological week 04, weekly average number of COVID-19 **active cases** increased by **0.1%** than the week before (**47,365** and 47,300 respectively); during the same time, weekly **recovery** decreased by **16.2%** (**3,331** and 3,976 respectively).

As of 31 January 2021, according to the DGHS Press Release **3,651,722** COVID-19 tests were conducted in Bangladesh with the overall positivity rate of **14.65%** (**3.02%** in last 24 hours) by **204** laboratories. Four Rapid Antigen test centers have been added to the network of COVID-19 testing facilities since last week. As of 31 January 2021, test per case is **6.82** which indicates the number of tests required to identify 1 case.

#### 4. Points of Entry & Quarantine

In the reported week (week 04, 2021), the number of international flights arrived at the designated international airport (HSIA) has increased by 6.8% than the week before (203 and 190 flights respectively) while the number of incoming passengers increased by **5.4%** (**34,951** and 33,172 respectively). In the reported week **364** individuals were sent to Institutional Quarantine after passenger screening at the Hazrat Shahjalal International Airport (HSIA).

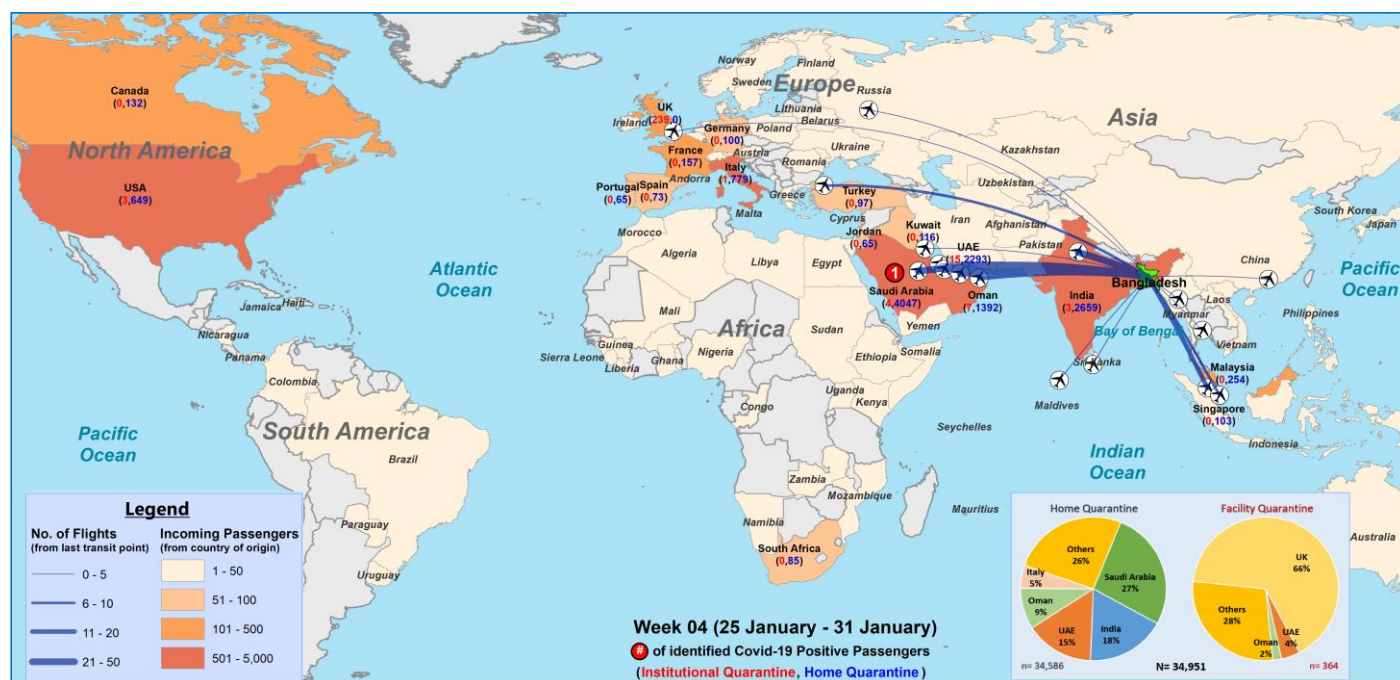

According to DGHS, as of 31 January 2021, the current institutional quarantine capacity in the country is represented by **629** centres across the 64 districts, which can receive **31,991** persons. A total of **46,902** individuals were placed in quarantine facilities and of them **43,727** (93.2%) have already been released. Over the same period, total of **99,127** individuals were isolated in designated health facilities and of them **88,636** (89.4%) have been released.

**The table below is showing distribution of incoming travellers in last 14 days sent to Home Quarantine as captured through PoE Surveillance, 18 – 31 January 2021, Bangladesh**

| Dhaka Div.       | 13,227 | Chattogram Div. | 12,408 | Sylhet Div.     | 3,298 | Khulna Div.  | 3,266 |
|------------------|--------|-----------------|--------|-----------------|-------|--------------|-------|

## 6. Research

Currently several COVID-19 studies are at various stages of planning and implementation. IEDCR has completed data collection of FDMN seroprevalence study. Work on data cleaning, merging and weighting is complete. Initial drafts of result tables and report is being prepared by IEDCR. In addition, IEDCR is collecting data for healthcare worker case-

control study in four government COVID-19 hospitals. Data collection of a similar study on healthcare workers will be resumed in several private hospitals soon by icddr, b. Protocol on national seroprevalence study is being finalized by IEDCR. All these studies have been designed and will be conducted with technical and financial support from WHO.

## 7. Vaccination

On 27 January 2021 Bangladesh launched the COVID-19 vaccination at Kurmitola General Hospital, Dhaka with AstraZeneca-Oxford University vaccine, Covishield manufactured by M/s Serum Institute of India. The limited number of participants like high level government officials, journalist and development partners including the WHO representative to Bangladesh attended the inaugural session. H. E. Sheikh Hasina, Honourable Prime Minister inaugurated the occasion virtually from Ganabhaban. Honourable Prime Minister mentioned in her speech that the vaccine recipient priority list was prepared in line with WHO's Scientific Advisory Group of Experts (SAGE) guidelines taking into consideration the Bangladesh context. A nurse of government run Kurmitola General Hospital became the first to receive the shot, followed by another 25 registered people like government high officials, doctors, nurses, law enforcement agency members etc. received the vaccine.

On 28 January 2021 five hospitals including Kurmitola General Hospital organized COVID-19 vaccination. The other four hospitals are Dhaka Medical College Hospital (DMCH), Mugda General Hospital, Kuwait Bangladesh Friendship Government Hospital and Bangabandhu Sheikh Mujib Medical University (BSMMU). Together total 567 registered frontline workers for COVID-19 response including two state ministers received the vaccine. All the vaccine receivers would be kept under medical observation for seven days, a timeline which would be followed by the nationwide vaccination campaign on 7 February 2021.
