

Medical Product Alert N°5/2021, 31 August 2021

Falsified COVISHIELD vaccine identified in Myanmar

- Falsified COVID-19 vaccines pose a serious risk to global public health and place an additional burden on vulnerable populations and health systems. It is important to detect and remove these falsified products from circulation to prevent harm to patients.
- The falsified vaccine products were reported to WHO in July and August 2021 in the WHO African Region, and the WHO South-East Asia Region.
