Annex 1: Detailed Terms of Reference

1. **Purpose of the APW** – To develop an online database and dashboard of Foster scheme implementation in Sri Lanka. The selected bidder is expected to support a three-phased dashboard development process from conceptual modelling to development of dashboard, as well as technical/ operational oversight of running of the dashboard during the implementation period under close guidance of the technical unit of the Ministry of Health, Sri Lanka and its identified experts.
2. **Background** – Implementation of foster scheme for malnourished children is a joint activity led by the Ministry of Health and Department of probation and child care services representing government bodies. But many other national, provincial, district and divisional level stakeholders are involved in planning and implementation of foster care system. As the Ministry of Health plans to implement the scheme for malnourished children across the country through district governments, the Ministry also wants to ensure community engagement by prioritizing information sharing of the project. This would help acceptance by the community, at the same time to inform the wider audience including public, policy makers, development partners and philanthropic organizations on the status of the implementation of the project and unmet needs. A web-based foster scheme dashboard would be one key option to ensure the desired reachout to the wider audience. This dashboard would be hosted/embedded as a webpage on one of the existing domains owned/maintained by the Ministry of Health. In addition to providing statistical and GIS-based information on status of implementation of foster care project, the web-page will also host other information and communication materials being commissioned by the Ministry of Health separately.
3. **Objective:** - The objective is to support the Nutrition Division of Ministry of Health and relevant district governments with a real time, quality assured, and accurate information sharing platform on implementation of foster scheme, its achievements, as well as transparency and visibility of the financial flows. The dashboard would also help in communicating the gaps and ensuring credibility of the support agencies that is vital for sustainable support system for real-time input into policy and operational decisions.
4. **Planned timelines** (subject to confirmation) – 01.02.2023 - 30.09.2023 (tentative)

Final version of the dash board need to be available latest within 5 weeks after signing the contract. Companies who has the expertise to develop the board within 5 weeks should apply for this task.

The dashboard development project is expected in three stages, **Planning, Development, and web-hosting (details provided below);**

5. Requirements - Work to be performed –

The contractor will closely work with relevant technical staff in the Ministry of Health, their identified experts and the WHO technical unit to understand the technical requirements, existing datasets, workflow, end users, access levels for data entry and visualization, and available technology infrastructure to develop the online database structure, and visualization dashboards. The dashboard must be capable of running on commonly used web-browsers through all types of commonly used computer operating systems. It must be fast, responsive and perform well to allow users to extract desired results quickly and make productive use of the dashboard.

The three stages of work would be as presented in three columns below, with launch to be expected within 6 weeks of initiation of contract, while the operational support to continue till September 2023.

The proposed dashboard is expected to have the following visual interfaces. The exact list of indicators would be developed in consultation with the team of technical experts within the Nutrition Division of Ministry of Health.

- GIS based visual data/statistics of malnourished children in districts covered under the scheme :
- Operational implementation of foster scheme the implementation. The dashboard will track the performance and current implementation process by the district/city governments. The technical team at Nutrition Division would help in identifying appropriate indicators for operational implementation, that may include frequency of implementation interventions in identified districts.
- Financial flow/implementation indicators: the visualizations may show the funding received by the districts, expenditures, as well as potential funding gaps based on identified needs (numbers to reach) for each district included.

6. **Inputs** – The Nutrition Division of Ministry of Health may constitute a technical team to help development of key indicators to be included in the database. Accordingly the team may also review and provide inputs on how best the visualizations should be developed for better visibility and understanding of larger audience.
